MONDAY MORNING, APRIL 29, 1833.

FOR GOVERNOR:

J. B. DAWSON.

We had no mail yesterday; we received, Saturday last, a mail containing New York dates of the 8th Philadelphia of the 9th, and Baltimore and Washington of the 10th inst. No event of any importance has transpired in the foreign department.

To the kindness of one of our commercial friends, we are indebted for the communication of Havre papers of the 6th and price current of the 7th of March, received by ship New Orleans, capt. Patten, from Havre. The intelligence conveyed has nothing of immediate interest; it contains nothing more than foreights and presumptions of editors.—The acquittal of Chateaubriand, for seditious opinions—the critical condition of the duchess of Berry's health—the convocation of the cortes—the seeming tranquillity of the east; such are the most interesting items, which we notice in the papers which we have perused.

Ship *Mary Howland*, from Liverpool (5th March,) arrived at New-York. See COMMERCIAL.

The New Orleans Races closed, the day before yesterday, in a much more spirited style than they had begun. There was, confessedly, a want of racers all along. On the last day, in order to make up a field against the *Lisbon Maid*, said entirely the cravings of the public *Bertram* and *Napoleon*, the latter from the stables of Mr. P. Pandely were entered for the silver cup. The Lisbon Maid took the prize from her competitors, winning the first and second mile, which were both run in one minute and fifty seconds. We are authorized to state, from the unanimous award of the judges of the polls, that the horses were in no condition to run, even half a mile; both being too high in flesh for racing; Napoleon, especially, being untrained and running without plates on a hard track.

A New Island.—Not the island which lately surged in the vicinity of the Marquesas, in the Pacific ocean;—not the cluster discovered by Captain B. Morrill; not the volcanic concretion, which suddenly rose off Girgenti, and disappeared as soon; but a snug little island, encompassed within the columns of the *Salem* Gazette, has been added to the geography of the world. Noticing the reception of papers from sundry quarters of Greece, the editor states that among others, he has received a file from the *island* of Napoli di Romania. Now we had always been taught to look upon both the Napolis, of Romania and Monobasia, as belonging to the continent of the Morea. It may be, that the long cherished dream of Pausanias and Strabo, has been realized, and that the isthmus, riven asunder by some convulsion of nature, has given an insular form to that peninsula of the Peloponesus. If it be not so; according to a custom, among early navigators, the island should belong to the editor by right of *discovery*. We have often wished with the poet, that "we had a bright little isle of our own," to enjoy the poetry of life, but we have as often been baulked in the wish; we envy, while we congratulate our *confrère of the Salem Gazette*, upon his new acquisition. Otho of Bavaria, may well spare him the *francellas* of the island, out of his recently acquired domaine.

FOREIGN INTELLIGENCE.

The Spanish cabinet and the government of Gibralta, have adopted measures in concert, respecting the cholera, which has made its appearance at different points in Portugal, and particularly at Oporto. Articles from Oporto and the neighbouring coast, to an extent of 25 leagues east and west, are excluded from Gibralta. Spain has made four lazarettos in the provinces of Galicia, Old Castile and Estremadura, with a *quarantine of 15 days*, and an observation of all travellers from Oporto. On travellers from other parts of the kingdom, the quarantine and observation are reduced to 6 days each.

The Gazette de France says:—"The present times are replete with instruction. We see in England, in France, and in America, the result of the right of insurrection, and of the principle of *the sovereignty of the people* set forth at the head of constitutions of human fabrication. The law of necessity and despotism, is actually resorted to by three governments, sprung from insurrection and the sovereignty of the people. The American Congress, the House of Hanover, and the younger branch of the House of Bourbon—three governments, which owe their origin to insurrections proclaimed glorious—are obliged at this very *moment* to check the consequences of their own principles by brutal force; and, by one of the most extraordinary coincidences that has ever happened, the necessity of arbitrary government is under discussion at the same moment at New York, London and Paris—three places where liberty has been proclaimed. Thus, after three centuries, the principle of insurrection established by Luther at Smalcalden—a principle which has given a wrong bias to the politics of Europe—is persecuted by the three governments which have sprung up from that principle."

EXPOSE BUDGET.—In a debate in the French Chamber of Deputies on the 19th February, the Budget of the Department of Foreign Affairs being under consideration:—

General LAFAYETTE, after some general observations on the universal good effects of the Revolution of July, which by the fire of the barricades dissipated the fogs of legitimacy, omnipotence, and aristocracy, and spread the dogma of the people from Chili to the Ganges, said that it was his duty to address a few questions to government on points in which the consequences of that Revolution had been frustrated or perverted. What were the *circumstances* or conditions under which the recognition of the government of Louis Philip by the various foreign powers had taken place? and what was the history of the famous letter from the French Ambassador *in St. Petersburgh*, which was four days in Par s before the President of the Council was allowed to have cognizance of it? Why was the Holy Alliance allowed to interdict the raising of the walls of Huninguen? Why were not measures taken to prevent and avenge the insults offered by Don Miguel to the French flag? The Gen. General then deprecated the imposition of a King on a populous Greece, *expressing his fears that the loan guaranteed* by France would be rather for the advantage of Russia than of Greece; and, after animadverting in strong terms on the persecution of the patriots in Italy and Poland, the prevention of which was, he maintained, the sacred duty of the French Government, concluded by declaring that he would not sanction the Budget of Foreign Affairs until satisfactory *measures were given on these points.*

The Minister of Foreign Affairs.—Before I reply to the speech of the hon. general, I must be allowed to say a few words in explanation of a point relating to myself personally. I have been accused of having, from this Tribune, denounced the Revolution of July to Europe as an event, in which right and justice were on the side of the late dynasty. If such had been my language, or my idea, I should not be guilty alone, you would all be equally culpable, for, if a Minister of the King of the French had had the effrontery so to express himself, you would have been unpardonably culpable if you did not tear him from the tribune, and instantly impeach him!—(Immense and continued applause.)—You have accomplished, we have accomplished a just and legitimate revolution—but was it legal? No, Gentlemen; for the very words revolution and legality are incompatible. A revolution is an appeal from the insufficiency of positive laws, to the eternal laws of justice and reason.—(Renewed applause.)—The hon. Minister then entered into a rapid but luminous explanation of the various explanation of the various points of foreign policy referred to by gen. Lafayette, denying the existence of any conditions for the recognition of Louis Philip by the foreign powers, explaining the existence of the formal treaty for the dismantling of Huninguen, detailing the means taken by government to obtain an amelioration in the laws and constitution of the Papal States, and expressing their confident expectation of their full success. He defended the choice of King Otho to reign over Greece, as the most eligible mode of securing the prosperity and independence of the country; spoke of the affairs of Belgium as in a satisfactory of accommodation; expressed his intention of allowing no insult to be offered with impunity to the French flag, either in Portugal or elsewhere; and, after rendering homage to the frankness and sincerity of England in the existing alliance with France, concluded by calling on the Chamber to enable government to pursue the system of universal peace and domestic prosperity on which all its policy was founded, by granting the Budget as proposed.

At a previous sitting of the Chamber, on a report on the Bill for granting a Supplementary credit of 2,900,000 francs to complete indemnities for damages done to private property during the revolution of July, 1830:—

Gen. Lafayette reminded the Chamber of the favourable manner in which those of the petitioners who were presented to Louis Philip, shortly after the revolution, were received by the new Monarch, and of the promises made to them, which he had no doubt would have been ere this fulfilled if death had not torn the late president of the Council from his high functions and his personal friends. He regretted that the Hon. M. Berenger filled the chair at this moment, or he could have given the Chamber many curious particulars on the subject, as he had been consulted on the rights of the petitioners. It was to be regretted that the Minister of Justice was not present, as he knew something of political conditions—(A laugh.)

The President inquired whether the Chamber wished him to enter into the explanations referred to by gen. Lafayette; but as several voices replied in the negative, he called on the next Cator inscribed.

One Middleton, 18 February, about the close of the Exchange, as Mr. Mellish, the celebrated contractor, was walking through a passage which leads from Threadneedle street to Bloch lane, he was accosted in very angry terms by an individual, who in the next moment discharged a pistol at his head. Mr. Mellish fell, exclaiming "Oh God!" and the assassin, who did not attempt to escape, was instantly seized and given in charge to the police. He gave his name Noah Pease Folger, and it appeared that he had been the master of a merchant vessel, of which Mr. Mellish was the owner. He complained that he had been driven almost mad in consequence of his having been turned adrift by Mr. Mellish without just cause. He was conveyed to Giltspur street Compter, preparatory to his examination before the city magistrate to-day. When Mr. Mellish fell, a number of gentlemen ran to his assistance, and had him carried to the nearest surgeon, when it was found that he was severely, but not mortally wounded, and his wounds having been dressed, he was conveyed to his residence.

Extract of a letter received in this city, by a respectable house, dated

NEW-YORK, APRIL 9, 1833.

By the ship Mary Howland, we have Liverpool dates to the 6th March. The sales of cotton on the 4th were 6000 bales, of which 2500 Americans at 6¾ a 8¾. On the 7th, the sales were large: American sorts had not improved. Some descriptions of Brazils were ½ higher.

The ship is yet a long way below, and being a transient vessel, we have no particulars. The packet of the 8th is supposed to be in the offing.

Here we have a fair demand for cotton, at steady prices. We quote Uplands 9¼ a 9¾, Orleans 11 a 13¾, Mobile 10 a 13 and 13¼

200 shares U. S. Bank were sold at 111½.

NEW YORK, April 8.

COTTON—The market continues in much the same condition as last week, there being a fair business doing at previous rates. We notice sales of 2700 bales of which 1400 were Upland at 10 a 12, including some fine at 12¼; 1500 Florida at 10¼ a 12½; 300 Mobile at 11½ a 13; and 450 New Orleans at 11 a 12½.

SUGAR.—The market this week was unusually active and nearly the whole stock of all descriptions has been taken on from first hands, except white. Two cargoes of St. Domingo have arrived since last report, and were taken on arrival at the wharf, at 8 a 9 cents, which is ¼ cent improvement on previous rates. All the New Orleans in market has been taken at 7 cents; about 1000 boxes brown Cuba brought 8 a 8½ cts. Cuba White, in small parcels, sold at 11 cents for prime quality, and 9½ cents for inferior. A lot of white Cuba, in bags, was sold at 9½ cents.

TOBACCO—The sales in this article extend to about 909 hhds. Kentucky at 3¾ a 5¼.

HAVRE, March 7.

COTTON has experienced a fair inquiry, since our last report, and excepting in a sale of 529 bales Uplands made on the wharf at 89 1-2 *all round*, in which the advantage is said to have been on the side of the buyer, our rates have generally been well supported.

The transactions from the 23d ultimo to the 6th instant inclusive comprise 6453 bales consisting of 2627 B. Louisiana at 94 to 111; 2585 B. Uplands, Mobile and Alabama at 89 1-2 to 105; and 270 B. Bahia at 113 to 115: all these prices duty paid.

Cleared this week, for New York 53 hhds 3 bbls; Baltimore 76 hhds 3 bbls; together 129 hhds and 7 bbls.

NEW YORK LYCEUM,
UNDER THE DIRECTION OF
MR. CHARLES COUDERT,
At Greenwich, 8th Avenue, near the North River, and two miles from the City of New York.

IN this establishment founded in 1828, by CH. COUDERT, are combined the two other French Schools, one recently conducted by MESSRS. PECQUET, the other by GENERAL LALLEMAND; it is conducted on the principles which have heretofore been approved in those institutions.

The English, French and Spanish languages will be taught as parts of a general education, by professors giving instruction in their native tongue, and the pupils will be practised constantly in speaking and writing the languages.

The Greek and Latin languages will be taught by competent professors, to those who may desire such instruction; and these pupils will be made to aid themselves in the acquisition of the modern languages, by a comparison with the ancient, so rich in their literature, and so closely connected with the modern, of which they are the sources.

The course of study to be pursued in the Lyceum, will be more or less extensive, according to the time the pupils may intend to devote to it, and the abilities they may display. The Principal does not profess or expect that every scholar will leave the institution with a complete and accomplished education; but, at least, he hopes in all cases to cultivate and improve the mind, and lay a sure and solid foundation for further acquirements. Neither care nor expense will be spared to accomplish these objects. The principles of Grammar, Logic, Intellectual and Moral Philosophy, History, the pure Mathematics, Astronomy; Botany, Geology, Mineralogy, Chemistry, Political Economy, Book-keeping and commercial operations in general, will form a part of the usual elementary course; while those who wish to pursue any particular branch more fully and carefully, will have every facility for so doing. Lastly, the attention of the pupils will be particularly directed to the literature of the nations whose language they may study, and the Principal hopes in time to be enabled to form a class competent to follow with pleasure and profit a course of polite literature or Belles Lettres.

Reasoning will be the principle of the discipline as well as of the instructions of the institution, and no corporal punishment will be inflicted.
