COMMERCIAL.

The following statement, the correctness of which may be relied upon, was drawn up for the Bee by one of the best informed merchants of our city. It shows the consumption of cotton wool in Great Britain, from the year 1810 to 1837.

1810	310,000 Bales
1811	311,000 "
1812	315,000 "

1836	1,022,944 "
1837	1,080,155 "
Total	16,956,613

N. B.—The consumption of American or U. States cotton having greatly increased of late years, as compared with other descriptions, which taken in connection with the increased weight of the bales, the comparative consumption in 1837 would be fully 1,200,000 bales against 310,000 in 1810.

Mississippi and Louisiana Cottons being usually sold in this market under the denomination of "Orleans Cottons," it is difficult to designate the annual production of each State separately; but that of Louisiana alone, within the last three years, may be assumed at 200,000 bales per annum, and the average production of Sugar at about 80,000 hhds. in the same interval, exclusive of Molasses, Syrup and Rum distilled therefrom. This would represent an annual value of $15,000,000 at the average prices then obtained for cotton and sugar alone, being the produce of Louisiana.

ALBANY, Aug 22.

Cotton—The small stock of cotton on hand, combined with the small receipts during the week, and the dull state of the markets on the seaboard, has caused our market to be very much depressed. For exchanges there has been some enquiry for fine cotton. We now quote 9a 11 cents as the state of the market. A few bales of Nankeen cotton have been sold during the week at 14 cents.

NEW YORK, Aug 20.

Cotton—The transactions have been mostly for home trade and not very extensive, sales of the week being estimated at 2150 bales. The feeling with shippers has been less buoyant, and large holders seem disposed to submit to a further reduction upon the inferior and medium descriptions, and all closed rather heavily. The sales include 1400 bales Uplands, at 9 a 12½ cents; 200 New Orleans, at 9 a 12½; 50 Florida 9 a 12½; 200 Mobile 9 a 12, and some parcels of Tennessee and N Alabama at 8 a 12½. The imports have been 2500 bales.

Molasses—The receipts have been small and prices well sustained, with rather an improving tendency.—Sales include parcels of Porto Rico and St Croix, at 40a42 cts; Havana and Matanzas 31a32; N Orleans 32a40 cts, and some hhds St Jago at 26 cents, all in hhds.

Sugars—There has been a good business done with the trade, and prices of all descriptions have advanced fully 1 cent per lb. It is estimated that the stock of Muscovadoes is not over 4000 hhds, and of boxes only about 1000. The sales include 400 hhds Porto Rico, some from second hands, at 7a8¾, the lowest price was for very inferior, 250 do St Croix at 8¾; 200 New Orleans 7¼8 cents; 70 Cuba Muscovadoes 7¾ cents; 700 boxes Cuba brown 7¾8¼ cents; 100 white 12a12½ cents; 100 bbls white Brazil 10 cents; and 140 bags of Java, white, 9¼, all in 4 mos.

Tobacco—There has been an increased demand, and an advance in the price of the lower descriptions of Kentucky, and also an improvement in manufactured. The sales include 80 hhds Kentucky at 5¼ a 8¼ and 9½; 1000 pkgs manufactured to the trade at 10½ 55 bales St Domingo 17¼, all in store; and 140 bales of the latter for export, at about 12½ cents, short price; also 40 hhds Kentucky at 8c, 300 kegs manufactured 10a13, both for exportation, and on 4 months credit, and 120 keg and boxes do to the trade at 9 a 15½ cents.

Exchange—Bills on England, for the steam ship Great Western, ranged on Tuesday and Wednesday at 108a108½ cents at which, quite a large business was done. On Thursday they advanced to 109 per cent and the demand was less active. Bills on France 5 a 5 25.

Freights—To Liverpool, cotton 5/16 and 3/4d. To Havre 1c and Full a cent.
