NEW-YORK MONEY MARKET, Aug. 23 — There was but a small business done in the stock market to-day, and prices were much the same as yesterday. We have, in fact, been obliged to record rather moderate transactions since the arrival of the Liverpool on Monday last. The great influence in the English money market, has been felt in Boston, here, and may have had a powerful influence here, and may yet lead to serious results, if it should be upon such securities as were hypothecated to some of our large banking and trade companies. The pressure upon Boston, and of course to alternative was felt, but to force sales at most ruinous losses, which have fallen heavily upon the holders of stock in many of our large Boston institutions, and particularly those organized under the general banking law; some how or other the client, frightened upon the trade capitals, have assumed themselves wonderfully; among them so much so that the exchange board yesterday, 102½ was offered, and the asked for the stock of the New York Banking Company. The stocks of the Mechanics Banking Association also rumoured 53 to 54, and Bank of the United States, 110 to 111. We do not anticipate any very special change in the money and stock market, and from the receipt of the European intelligence by the Great Western, which are not likely to reach us until the 6th prox. If England has an abundant grain crop, it seems to be most important to her, and from her financial difficulties, that there is to be seated, at present, as it does not show in her favor, and not to be obliged to pay specie for a balance of trade against her, which determines the course of exchanges on her favor, which is not the case at the present time.

The arrangements, however, that are known to have been already made between the Bank of England and certain bankers of the Bank of France—in conjunction with the large import of specie (not has recently been shipped thence, and most most active demand from the United States, for specie, and the recent determination on the part of the Bank India Company to reduce their rate of exchange from 2s 0d to the company's rupees, the object of which latter movement, being to restrain the exportation of dollars, will give a premium in favor of the exportation of goods, nearly 6d per rupee, must produce some immediate improvement in the English money market.

In the foreign exchanges there has not been any further change—Bills on London have been offered by the Liverpool packets to a fortnight 9 ⅝ @ 9 ¾ and 9 ⅞ @ 10 ⅛ for the Boston Packets.

NEW-YORK MARKET, Aug. 21 — Cotton—Although the prices advanced just a cent @ 8 on Monday, in consequence of favorable accounts received from Liverpool, they have again receded to the standard of last week, and the transactions are still moderate.

Flour and meal—The rate of flour for the past two or three days have not risen of over 12¼ higher than the last week, and the transactions have been moderate, the receipts of which those of Monday, the day succeeding the arrival of the Liverpool, which by which we have to record, were estimated at 6,000 barrels, and in selections of about 12¼ the barrel on the previous that day. We note western, common to fancy 5 dollars, 2 @ 5 ⅝ @ 5 ¾; Richmond county, 5 ⅞ @ 6 ⅛; and Ohio, 5 ⅞ @ 6 ⅛.
