MISCELLANEA.

Preservation of the Sight.

MR. C. DUHAMEL, optician, 6 Chartres street, begs leave to inform the public in general that he has just received a fresh invoice of patent Cylindrical Glasses, approved by the most renowned oculists in Paris, and Dr. Sand, Remilson, Crawcour, Nee and others in New Orleans. The curb is such that these glasses can be used without the least danger to the weakest eyes.

The most skillful opticians have made a report declaring that the above articles are unquestionably the best for the preservation and improvement of the sight.

Their superiority over all others consists in the focus being equally divided over the whole surface, instead of being in the center only, as in the case with spectacle glasses generally. The introduction of the two cylindrical curbs makes them besides achromatic, and, consequently, much clearer than the others.

Near-sighted persons will find a great improvement in these glasses.

A pattern, showing the advantages of these new glasses will be exhibited and explained, on application to Mr. Duhamel, to all those who may be desirous of being further informed on the subject. feb17
