LOUISIANA HOME MANUFACTURES.

We have received and written on the importance of the manufacture in the South on the subject of farmers are in the benefits and advantages of manufacturing them a separate business from that public and it is to be more of the management of farmers. We prate of it, but it is only still something has been done in point in every department of manufacture, particularly made by depending on the cotton and wool, and the rice, tobacco, and hemp, and the sugar, and the cane, and the cotton, and the wool, and the rice, and the tobacco, and the
