COMMERCIAL.

OFFICE OF THE TIMES,
FRIDAY EVENING, July 24, 1857.

With limited arrivals of produce and but little demand for export, our general market continues to wear a quiet appearance. Cotton has gone off slowly, and at full prices, the stock this week footing up a low page. In Tobacco, we still notice considerable movement, however, the operations still being conducted in a very private manner.—Flour, Corn and Provisions of most kinds have been very quiet, though we report limited transactions. Freights have improved a little, and Exchange continues quiet.

We yesterday morning published advices from Liverpool to the 11th instant, per steamship Cleopatra, reporting an advance in Cotton of fully 1-16d., and quoting the Liverpool Market, and Middling Orleans at 8½d. The sales of the week were stated at 97,000 bales, including 14,000 for speculation and export.—The stock in port was stated at 656,000 bales.

COTTON.—Arrived since the 17th instant, 1,800 bales, cleared in the same time for Liverpool, 7,364, Havre, 2,119, Barcelona, 1,322, Genoa, 1,016; New York, 120; Boston, 400, and Philadelphia, 200 bales; receipts, 12,849 bales, making a reduction in stock of 11,149 bales, and leaving on hand, including all on shipboard and in the various presses and pickeries not cleared, a stock of 16,125 bales.

The week opens with some anxiety for the medium grades, and on Saturday 1000 bales were sold at very full prices. On Monday, however, with but little offering, we did not hear of a sale, and on Tuesday barely 500 bales changed hands. A few buyers came in on Wednesday, and took 800 bales at outside rates, and yesterday 1,000 bales changed hands at the same. To-day we notice only 100 bales taken, making a total for the week of barely 3,300 bales, the market closing firmly at our quotations, especially for the medium grades.

TOBACCO.—There has been a good demand throughout the week, but the transactions have been strictly private in good manufacture, and it is difficult to arrive at the amount of sales, or the range of prices. From the best information we can obtain we estimate the sales at about 600 hhds, and the market is steady, latterly, to have exhibited more firmness. We repeat our last quotations, which, however, are entirely nominal for most qualities.

IMPORTANT TO COTTON PLANTERS

By which their incomes must be Doubled.

THE undersigned has invented and obtained letters patent from the United States for the arrangement and combination of machinery for converting Seed Cotton into Yarns by one continuous process, from ginning, until it is ready for shipment or weaving. The saving of labor is estimated at 50 to 75 per cent, and as I exclude in my process the use of machinery to press the cotton into bales, or in handling at all, the cotton in open and disentangle it, which are very destructive in their operations on the fibre, as well as the expense of the bales of ginning and spinning as separate manufactures, my YARNS are made of unbroken fibre, and hence will be fifty per cent stronger. Planters and Planters will be informed as to terms, with complete instructions how to use, on application to the best machinery, and all other necessary particulars, on application addressed to the undersigned, or by consultation with me at my rooms, corner Front and Dauphin streets, up stairs.
