Fever and Ague,

FROM which mankind suffer more than from any other disease, is the consequence of a diseased action in the system, induced by the poisonous miasma of vegetable decay. This exhalation is received into the lungs near the earth's surface, and the virus is taken into the blood, and thus spreads over the system. There it acts as an irritating poison on the internal viscera and excreting organs of the body. The liver becomes torpid and the bowels not only fail to relieve, but also the bile from the blood. Both the virus and the bile accumulate in the circulation, and produce violent constitutional disorder. The pulmonary lungs and the stomach sympathize with the liver, and become disordered. Finally, the disease of our organism, as if in an attempt to expel noxious influence, concentrates the whole blood of the body in the surface, producing very bright and cast it out. The blood leaves the surface, and rushes to the central organs with congestive violence. This is the Cold Fit of the ague. The fever follows. Fevers follows, in which the blood leaves the central organs and rushes to the surface, as if in another effort to expel the irritating poison through that other great excretory—the skin. In this also it fails, and the system exhausted by the violent exertion, and waits for the recovery of strength to repeat the unequal effort another day. Thus are the fits or paroxysms of Fever and Ague. Such constitutional disorder will of course undermine the health, if it is not removed.

We have labored to find, and have found a antidote.

AYER'S AGUE CURE,

which neutralizes this malarious poison in the blood, and stimulates the liver to expel it from the body. As it should, so it does cure this afflicting disorder with perfect certainty. And it does more—it does does what is of more service to those subject to the infection. If taken in advance, it fortifies the system as it is absorbed, and thus keeps those who will free from its attacks; keeps the system in health, although surrounded by the Poison, consequently it not only cures, but protects from the great variety of diseases which are the result of the malignant influence, such as Remittent Fever, Chill Fever, Dumb or Masked Ague, Periodical Headache, Bilious Headache, Dysentery, Diarrhea, Colic, Rheumatism, Gout, Blindness, Toothache, Earache, Clearly, Asthma, Palpitation of the Heart, Inflammation of the Spleen, Hysterics, Cholic, Paralysis and Painful Affections of the Stomach and Bowels, all of which, when arising from the Malarious Poison, are the same more or less the intermittent type. This Ague Cure removes the cause of these derangements, and cures the disease.

This it accomplishes by stimulating the excretory to expel the virulent poison from the blood, and organs by degrees become habited to do this their office of their own accord. This accordance is what we term *acclimatization*. Time may accomplish this end, but often life is not long enough, or is sacrificed in the attempt, while Ayer's Ague Cure" does it at once, and with safety. We have great reason to believe this is a sure as well as safer remedy for the whole class of diseases which are induced by miasmatic infection, than any other which has been made public. And it is of incalculable importance advantage to the public, by which it is in its power as well as good.

has won for itself such a renown for the cure of every variety of Throat and Lung Complaints, that it is entirely unnecessary for us to recount the evidence of its virtues. Its reputation is established. As it has long been in constant use throughout this section, we need not do more than assure the people its quality is kept up to the best it ever has been, and that it may be relied on to do for their relief all it has ever been found to do.

ANTI-GOUTY ELIXIR
OF
HIPPOLYTE BREUGNONE,
INVENTOR OF THE ANTI-RHEUMATISMA
Tropical Balm.

TILL now all medical science has had no power over the gout, this terrible disease which has ever made so many victims all over the earth, and still leaves daily so many victims from their unhappiness to give them up to the most painful sufferings. It is useless to recall to our minds the symptoms of this disease too well known to its numerous sufferers. It suffices to name them to appreciate the value of such a remedy against their return. Such is the effect of the ANTI-GOUTY ELIXIR, which is the result of the laborious searches of H. HIPPOLYTE BREUGNONE, already known by the discovery of the anti-rheumatismal TROPICAL BALM, that has had down to this day no great a success. The ANTI-GOUTY ELIXIR, particularly designed for curing the fits of the gout, possesses a power no less great, warranted by a long and a very lucrative sale, the inventor, and by repeated essays upon its numerous victims.

The ANTI-GOUTY ELIXIR is easy to take, and its taste is in no way disagreable. It can be taken pure or mixed with two or three spoonfuls of sugar or coffee. Its effects are felt after a few hours, whatever may be the intensiveness of the fit. In twelve hours at most the inflammatory symptoms are in a complete vanish away.

For sale at the general depot, in New Orleans, at

J. WRIGHT & CO,
21 and 151 Chartres street.
