KEROSENE.

NOTICE TO FAMILIES

THE city papers having recently reported the case of a Coal oil Lamp explosion in the Fourth District, we think it proper to beg our customers not to confound the Kerosene Burning Fluid or Oil in the market (the greatest part of which is adulterated) with KEROSENE, a species of Coal Oil we have alone the right to sell in Louisiana.

Kerosene, which is now manufactured under American and English patents, is ENTIRELY FREE AND FREE FROM ANY ADMIXTURE OF ALCOHOL, OR OF ANY VOLATILE OR EXPLOSIVE PROPERTIES. It is a new and inodorous product, ranking between the fixed and the volatile oils, as do all other PURE coal oils.

Manufactured by a peculiar process, thoroughly secured by letters patent, Kerosene is now acknowledged in the United States to be a perfect article and the only substitute for any burning oil whatever, as much for its illuminating power and economy as for its improved color and deodorization.

For want of Kerosene we have sometimes sold, and we will again sell, under similar circumstances, other coal oils, but in so doing we will always, as by the past, fully test these other brands, so as to detect any adulteration in them, or to see if they do not contain an admixture of benzole, which sometimes passes in the oil while being distilled, and thereby renders it volatile.

MISCELLANEOUS.

Fever and Ague.

FROM which, unless cured, the victim is doomed to a long and painful sojourn in the shadow of the grave, the consumptive, to the last stage of his fatal disease, and the dyspeptic, to a life of misery, are alike the victims. The consumptive is evidently cured, and the dyspeptic, if not cured, yet will find the remedy which will cure him. Within the pale of human skill there is no remedy for the cure of the above complaints, and the treatment that should be followed in order to effect a cure.

Dr. Jayne, in his work on the internal organs, and the nature of the human mind, and the various diseases arising therefrom, and the cure, in a plain and intelligible manner, the nature of the various organs of the body. The liver becomes torpid and fails to secrete not only the bile, but also the bile from the blood. Both the liver and the bile accumulate in the circulation, and produce the yellow complexion, called the jaundice. The digestive organs become torpid. The patient, the kidneys and the stomach sympathize with the liver, and become disordered also. Finally, the internal organs, as if in an attempt to expel the noxious influence, concentrate the whole blood of the body in the internal secretories to force them to eject it out. The blood leaves the surface, and rushes to the central organs with congestive violence. This is the Chill. This is the Fever. This is the Ague. This the Fever follows, in which the blood leaves the central organs and rushes to the surface, as if in another effort to expel the irritating poison through that other great secretory—the skin. In this also it fails, and the system abandons the attempt exhausted, and waits for the recovery of strength to repeat the hopeless effort another day. These are the fits or paroxysms of FEVER AND AGUE. Such constitutions disorder will of course undermine the health, if it is not speedily cured.

We have labored to find, and have found a antidote

AYER'S AGUE CURE,

which neutralizes the malignant poison in the blood, and stimulates the liver to secrete it from the body. As it should, so it does cure this afflicting disorder with perfect certainty. It and it does more, or rather does what is of more service to those subject to this infection. If taken in season it expels it from the system, and it is prepared, and then keeps those who use it free from its attacks; keeps the system in health, although exposed to the disease. Consequently it not only cures, but protects from the great variety of affections which are induced by his malignant influence, as Remittent and Bilious Fever, Chill Fever, Dumb or Masked Ague, Periodical Headache or Bilious Headache, Bilious Fever, Neuralgia, Rheumatism, Gout, Bilious Pleurisy, Bilious Colic, Catarrh, Asthma, Palpitations, Painful Affections of the Spleen, Hypochon, Chole, Paralysis and Painful Affections of the Stomach and Bowels, all of which, when arising from this cause, will be found to assume more or less the intermittent type. The "AGUE CURE" removes the cause of these derangements, and cures the disease.

This it accomplishes by stimulating the excretories to expel the virus from the system; and those organs by degrees become habituated to do this their office of their own accord. Science arises what its term acclimation. Time may accomplish the same end, but when life is not long enough, or is sacrificed in the attempt, while this "AGUE CURE" does it at once, and with safety. We have great reason to believe this is a sure as well as safe remedy for the whole class of diseases, which are caused by the miasmatic infection, than any other which has been discovered; and it has still another important advantage to the public, which is that it is cheap as well as good.
