Per New Orleans, Opelousas and G. Western—124 pkgs sundries, 1 do 1 bbl 1 do 1 bbl mdse 10 bbls sugar and sundries.

Scrofula, or King's Evil.

IT is a melancholy reflection that a disease so fatal in its effects, and so widely prevalent as Scrofula, should be so little understood by the medical profession, that they have been discovered for the expression of the disease, which when developed in its terrible form appears from its loathsome consequences, almost as much a disease of the mind as of the body. It is the same disease which, under the name of Evil, was so frequently touched by the Kings of England, and which, from the circumstance, was called the King's Evil. Its manifestations are as various as its victims are numerous. It may show itself in the form of a simple pimple, which, breaking out on the face, or any other part of the body, and being neglected, or improperly treated, or even, perhaps, from its insignificance, not attended to at all, may, in the course of a few years, have so undermined the constitution, that the slightest cut or bruise, the simple prick of a pin, or the bite of a mosquito, will mortify, and, in a few weeks, carry to the grave, the victim of this insidious disease. Or it may show itself in a form less alarming, but more distressing, in a tumor, or swelling, on the neck, which, gradually increasing for years, ulcerates, and, after a long and painful course, heals, leaving a cicatrix, or scar, which, if the patient survives, may be, for years, or even during life, healed, and yet, on the first cold or change of weather, or from any other cause, may break out again, and, as before, run through its various stages, and, in its progress, seize on the bones, or any other part of the system, and, in its effects, entirely destroy the patient. Or it may show itself in the form of a white swelling, which, commencing with a slight pain in the joint, may, in a few months, or even years, so destroy the joint, that, to save life, it may be necessary to amputate the limb, or, if the joint be in the neck, the patient may be left a hideous cripple, or, if in the back, may, by the ulceration, so weaken the spine, as to produce a curvature of the back, or even
