The whole is offered on favorable terms; likewise wines of the same qualities received by preceding arrivals. P. LAFAYE. nov 6

GARLEPIED & CO. Distillers, Pump-makers, Water-engine-makers, and Mechanicians, Comde street No. 48, between Maine and St. Philip streets.

HAVE the honor to inform the Planters of Louisiana, that they make all kinds of kettles; sugar-kettles; cooking kettles; roasting kettles; lamps; spoons, and sugar-skimmers, etc. etc.

They have bought from France the last mode of making the apparatus for distilling, which has been perfected by the best distillers, such as Derone, Baglion, Derode, Zic, Adam, Bourard, etc. etc.

They are themselves the inventors and proprietors of a new apparatus for distillers, which though not an expedition as that of Demas and Baglion, offers to the distillers of Louisiana and Texas, the same results as to quantity, quality, and for the rectification of alcohol, there is greater security in the working of it without the constant care which other apparatus indispensably require. They make all kinds of alembics, such as conue, chaptal, bain, etc. etc.

For the kettles, distilling apparatus, and alembics, they will put them up, and see them go into operation and give instruction therefor, until those who have the care of them are sufficiently initiated.

They will make all kinds of pumps, such as fire pumps, arrosages mounted, aspirant well-pumps, Foulanters and Elevatory (English sites) vocation pumps, throwing a great deal of water with a very little force; in consequence of these pumps being without pistons or any kind of frof tesman, they cannot easily be deranged. They are constructed in the same manner to pump up strop, or any other boiling liquid. There is nothing omitted to make them serviceable, and their solidity is guaranteed against all derangements.

They also make ward robes or inodorous valve hydrolics, which do not let evaporate any odor, the feculent mat, being retained for a month or more.

They also make filtering-stones, which purifies in a very short space of time a sufficient quantity of water without the intermization of any strange body. And likewise, beer kettles, teleture kettles, tallow kettles, wax kettles, boilers with three cylinders, do, with furnaces, all kinds of boiling establishment for public and pri-ate houses; kitchen utensils of copper and iron; covering for houses; troughs; tanks, and cocks to furnish water throughout a house, the same as established in all the great hospitals in Bordeaux.

They charge themselves with repairing all kinds of kettles—coverings of all kinds of pieces and with the fabrication of every thing that can be made of copper, iron, and zinc.

The moderate prices they charge, and the solidity and superior workmanship of every thing that comes out of their shop, assures them that satisfaction will be given to all who may favor them with their confidence. sept 9
