

A great Democratic meeting was held in Albany, N.Y., on the 25th ult.

The Albany Argus says—“It was one of the largest ever held in this city. It was truly an exciting and animated assemblage.”

“The hall was crowded far beyond its capacity—and long before the roar of cannon which enlivened the time of our independence had subsided, very many found it impossible to gain admittance.

It was a rally, in all respects, where the triumphs of the people over the enemies of the country, and characteristics of the energy, determination and spirit of the democracy of the day.

Dr. Peter Wexford, Chairman of the Republican Com.

Com., intended, assisted by J. H. Bogart, Peter Gouverneur Morris, George C. Schuyler, Robert E. Ward, Patrick S. Hartigan, Samuel Cluett, Robert S. Fowler, Judah P. Karsky and Lemuel Stebbins, & C. St. Paul, gathered at the United States Hotel, on a wind, in which they were all beaten hollow.

The “Thunder” arrived next morning, and then

came the “Crisis,” “Advertiser,” and “Cotopaxi.”

The meeting was addressed by Gen. Dix, Thos. Hoffman, R. Wood and D. O. Coffey, Esqrs. the State and County nominations were approved by acclamation, and the whole proceedings were in the highest degree enthusiastic, and afforded a clear proof of the prevalent spirit among the Democracy of the day.

A value of one hundred guns was fired at the opening of the democratic meeting at the capitol, in honor of the recent democratic election of Maine, New Jersey and Pennsylvania.

#### ENGLAND.

LONDON, Sept. 24.—The favorable news received from Portugal that the Emperor Dom Pedro was recovering his health, and the country in general improving, has inspired speculations in the Funds with much confidence.

The dinner to Earl Grey was given at Edinburgh on the 19th. It was a very splendid affair. The number of guests was about 2000. Earl Grey, who was toasting, used each

for the hospitality with which the citizens of New Orleans had received him.

Dr. Portman, of the name of the physician of this city, then welcomed Dr. Antonomarzio, and tendered him, in their names, whatever service he might require.

In the evening, a party, among whom was several of the friends of the Orleans' interests, repaired to the residence of the doctor and seconded him. Some popular air were played, toasts were given, and the utmost hilarity prevailed among the company, who, at the previous invitation of the doctor, partook with him of some refreshments. The doctor, during the evening, related some new circumstances in the life of the great Corse, which were listened to with the most profound attention.

The doctor has his rooms at “Merry's,” near the Exchange. He intends, we believe, to locate himself permanently in our city.

Mrs. Hedges and Mr. Farlane, the newly elected aldermen for the first ward, appeared in the city council last Saturday for the purpose of taking their seats. A committee which was appointed to verify their election reported that the former was duly entitled, but that the latter, in consequence of not having brought his receipts for taxes could not sit until he had produced them. A delay of eight days was accorded him to comply with the requirements of the law. The point of inability on account of being employed in the Marine Hospital was not noted.

The entire equipments for the French theatre have been completed, and the public may anticipate much rational amusement this season at that establishment. Some of the best performers in France have been seen—the manager, Mr. Davis, having spared no money to gratify his patrons. It is to be hoped that his exertions will be properly rewarded.

Yesterday the convicts hitherto confined in the parish jail of this city, took their departure for the state penitentiary at Baton Rouge. The most of them exhibited an appearance of hardened guilt.

A large sale of lots of ground, by Isaac L. McLean, will take place this day—the terms of sale being very advantageous to purchasers. 300 of those lots are situated in suburb Marly (near of Jefferson) and the greater part of them lie in the new canal. The situation of these lots afford a chance for speculation. Owners are situated at Carrollton, 52 in the suburb Boulard, 2 in the new suburb Marly, and 10 others at Mandeville. (See “Advertisement.”)

Another sale which deserves to attract the attention of the literati, also takes place today. It consists of the library of the late Charles Jourdan, among which are several valuable works.

On reference to our advertising columns, it will be seen that an association of gentlemen propose establishing a literary paper in our city under the name of the *Orleans Register*, the proceeds derived therefrom, over and above the actual expenses, to be appropriated to the malapropos asylum. The establishment of such a paper cannot but prove very desirable to the community, and the charitable disposition which it made of the funds, should induce every man forthwith to put his name upon the subscription list.

Mr. Edward Wyer, boundswoman from the *Evening Post*, arrived in New York on the 21st in the packet ship Havre, from Havre, bringing despatches from our Ministers at Paris, and Madrid of a very important character. A treaty has been made with the Spanish Government, and signed by the Queen and Prince, allowing our claims of six hundred thousand dollars. Mr. Wyer has been absent from the United States about a hundred days, and in that time has travelled upwards of 10,000 miles. He left next day for Washington. Thus we have another evidence of the sound policy of the administration of Gen. Jackson, who “asks nothing that is not clearly right, and submits to nothing that is wrong.”

One of the administration members of Congress in Ohio who has been defeated in the recent contest, and of which circumstance the Bank forces vainly protested was elected in 1833 by the enormous majority of 900 votes! “Glory to Whig Victory!” “Oho redeemed!” &c.

To the Editor of the *Bee*:

Sir: As I have been sundry reports circulated respecting the inability of Mr. Banks to represent the 6th ward, in consequence of his not being a resident thereof, and as the same is made a tool to injure his election, permit me to chronicle through your journal, *Argus of Western District*, what you have done. Mr. Banks is perfectly disinterested in his residence, and would be unable to suffer its effects in favor of James H. Caldwell, a man who is decidedly obnoxious to the great body of merchants and mechanics in our ward. We are borne out in this by the statements of such a state of things, that in doing so, they are symptoms of such a state of things. I do, in doing so, what is generally extended to me by my countrymen since my retirement from office? Is it to be found in those expressions of regard and attachment, which I have met with in every step of my way to this place? Is it to be found, lastly, in the meeting of this day, which, whatever the vain imaginations of some men may suggest to them, is a pretended reunion in the public mind, would never have taken place if it was not the result of a general feeling in favor of reform? No, gentlemen, of the good old cause of freedom, of the principles of justice, of equality, of truth, of the rights of man, who would not be moved by the mere name of freedom? But, as far as I can see, the cause of freedom, of the rights of man, who would not be moved by the mere name of freedom? But, as far as I can see, the cause of freedom, of the rights of man, who would not be moved by the mere name of freedom?

Mr. McDonald is a high-minded and honorable man, and, I trust, he will not fail to be a faithful representative.

Many Citizens of the 6th Ward,  
CIRCUIT AT.  
For the Bee.

The Graduates of the College of Physicians and Surgeons of the Western District, New York, and all others upon whom it may concern:

It may be known to some of you, who are scattered abroad over the far west, and to be found in every hamlet throughout the state which bears our Alma Mater, that you have occasionally seen fit to constitute Medical Boards, and thereby like to grant certificates to qualified applicants desirous of the practice of their profession, likewise to license or legalize the practice of those already holding such certificates from the proper authorities in other states.

It is well known to you, that a Diploma from a Medical College is almost a sine qua non, and sufficient claim to a license from an inferior Board, and that such a diploma is in many instances of little value.
