CITY AFFAIRS.

We are happy to antice that an all important change about to take place in the management of our city effairs. The bill introduced hast Saturday night by Mr. McCready reating a street commissioner, will have the desirable effect of cleanaing the augean stables of our municipa administration, and of preventing further abuses in nost important branch of the public service. Our readers will call to mind that a bill was introduce

short time ago-by the committee which waited on Mr. Pilie, to bog him to withdraw his resignation as city surveyor, which he had tendered, creating a city engineer, who was by that bill to have all the powe hitherte exercised by that officer over the employment of the laborers in the service of the corporation. He was also to have the power of leaving bone for all materials pureredit it when they learn, that the city carte and laborers rost for the last nin: months the enormous sum of \$92,000! For onrecives, when we heard the fact stated, we disbelieved it until we were convinced by occular de tion. How, all this, vast sum can possibly the expen ded we are at a perfect less to imagine or conceiv The public should be enlightened on this point, and it lehooves der aldermen to set on foot the proper inquiries, By the bill creeting an Engineer, the Council have noth-

ing to do with the perchasing of materials, that officer being empowered to indee his bond unlimitedly for them. This in itself, is a decided ob action; for it gives a higher privilege to him than even the mayor himself has, and places him in a situation where he may abuse the public confidence as much

To exemplify the danger of so extraordinary a prowe have only to cite the fact that, on a recent eccasion when the corporation parelissed \$30,000 or \$60,000 worth of bricks for same public workship Mayor applied to the Coungil for leave to asbeeribe the honde therefor, which were made payable in twenty years. New, under the operation of this tall, this, would have fallon under the immediate provhos of the engineer, and it is hard to tell what would have been the nitimatum which he would have stooped at, whether at \$40,000 or \$100,000.

hir. McCready's bill, which we publish to-day, and to era ameliorations introduced in our present defective system of city government, was moved and carried as a substitute to the bill upon which we have been animadverting. It does away entirely with the enormous and ascient expenditure of \$12,000 for city carts and labourers. It are meceptible of such great abuses. The cleaning and repairing of the streets are to be given out to the lowest bidder, and the street Commissioner is charged with eraing that the contractors do their business properly. Should this play go into operation, we venture to predict | st that it will be found to be of the most saintary character. The streets will be kept in perfect order for a sum considerably less that is now paid for the carte and laborers, that manable every day at 2 s'clock behind the cathedral.

We trust and hope that this measure will be sanction by the mayor. The community are beginning to be sen sibly alive to the necessity of reform, and if chatacles be thrown in the pray of it, the result will be that those individuals who may pursue so unwise a policy will rende themselves both unpopular and obnesious.

of a vindictive and desperate faction could device, has been reserted to by our opposionts, they have poured out their money so though it was water, but to no effect. For a week past they have been marching through the City with their minature frigate Constitution with music, flags, sailors, etc. for the purpose of dealing the nawary but gullable veters; when they heard that they had gained the odd member of Congress in Ohio, they fitted out a moble and splendid expedition to the North and West. They chartered this large steamboat Ohio, and appeaded to her thousands of flage and streamers and proceed up the North River, firing all the may nute guas with large nine poundars; previous to her going hey sent oversioneriers up the river to make preparations for a proper recuption in the river towns such as illuminatione, returning the salates which the best would fire, de. The latter part of the voyage up the river was performed by night when the hout was illuminated and fire works, and rackets shed a glaring light upon the river and surrounding country, but to no effect I presume. After the steamheat arrived at Albany there was a great torch light procession through the streets, and then the Bank Tories took Canal Boats, and proceeded as farks Ballalo, firing minute guns al the way. When the stemmont returned to N. York, the Bankites formed a procession and szarched through the streets during the whole day, with their frigate Constitution entil night when she was suspended up in front of Masonic Hall upon the bows of which they chained a tive engle, upon which a Jackson lady passing by composed and wrote the
