Guided by this memorable dictate, we have occasionally been obliged to deprecate all measures establishing geographical divisions in the American Union. We have opposed, the cell of South Carolina for a convention of the southern states, because we do not desire any distinction even in name between the states where slavery does or does not exist: the same constitutional rights and guarantees belong to all, and should be maintained by all unimpaired without any distinction of place. A difference of party as zegards the should not ingressed to the continuity of th general government does not imply and should not in-duce a division of persons as regards districts. Let-such a division once exist—let a civil er political line of demarkation be once drawn between state and states demarkation to once drawn services and states district and district, or a combination of these—and the dissolution of the union will become inevitable. When therefore we see politicians—to subserve their own selfish or ambitious views—seek to draw a geogn spaical distinction between the states northern and so uthern, on account splely of constitutional slave-ry mas essatily existing in the region, and obviated in another, we may consider them friends of their party. This system of determining the qualifications of any man or candidates chiefly or solely by his birthplace or residence, without regard to his personal merits and the principles which are fre guide of his conduct, is likely to lead to the most deplorable results of exclusivism—to bitter contests between states, see these and clusses, which may and must eventuate in the dissolution of the noise, the dismontrance of the noise. lution of the union, the dismemberment of the might boring states: and should therefore (in the language of the immortal Washington) be considered hostile to the liberty and independence of America.

South Carolina sought to establish commerce by to riff duties as a bone of geographical contention: we are all apprized of the injurious effects. Yet her conduct was based (as she supposed) on constitutional rigids, altho' congress in according with the constitu-tion had imposed uniform duties on imports. Let us set up the manufactures or produce of different states, as a source of contest between geographical districts would not the evils be equal or greater than if the dil ference were based on commerce? would not his system be equally wise and expedient as to oppose the sintes east against, those west of the Ohio and Mississippi rivers—or those north against those south of Muson's and Dixon's line?

Yet this culpable expedient is the missisable policy of those who advocate Judge White as a candidate for the presidency,—placing his merits solely on his resid nee and easual connection with a particular class of his countrymen, regardless of the inevitable evils certain to result from opposing the south to the north Every warm friend of the American Union should resolutely withstand all differences founded on geographical distinctions between citizens and states in this cal distinctions between citizens and states in this union, as requested and required by the father of his country.
