NEW YORK, Dec 15.

MONEY—Sales of Exchange for the packet of the 16th closed yesterday and 8 per cent was the highest premium paid for Sterling Bills. The rate precludes the possibility of a demand for specie, and in connection with other circumstances, creates strong expectations that the pressure on the money market is passing away. Stocks were all firmer though two days payments had to be made yesterday, it caused no embarrassment; the rate of discount is still however

COTTON—The cotton market remains without much animation, and although no further variation can be distinctly traced in the operations since our last, prices may be considered as barely maintained. The sales have been for shipment and home use, including 500 Uplands at 16¾ a 18; 100 N Orleans, 17 a 18; 50 Mobile 16 a 18½; together with some very choice but trifling parcels at proportionate prices. The highest sales are still on time

NEW-ORLEANS:

MONDAY MORNING, DEC. 26, 1836.

THE LEGION.

This excellent corps assembled yesterday on the public square, in order to perform the ceremony of receiving a standard, and of saluting with their drums, their musketry and cannon, this new symbol of fraternity, patriotism and courage. It will be remembered that this flag was voted to the legion by the city council on the 31st August 1835, as a testimony of public gratitude for its firm deportment at a time when the tranquility of the city was menaced with a serious disturbance.

We regret that the bad weather, which prevailed throughout the whole of yesterday occasioned an almost total failure in the order of the ceremony. The torrents of rain which fell prevented the salute of cannon and musketry from being fired, and the soldiers, wet and muddy, were obliged to return sooner than they wished. The accident is the more to be deplored, as a very imposing ceremony was anticipated.

IMPORTANT IF TRUE.

It was rumoured on Saturday and yesterday on the authority of letters, we know not whence or by whom received, that the royal party in Mexico had declared the infant of Spain, Don Francisco de Paulo, King of that fine country, that France and England had declared in his favour, and had furnished him with resources to work his way to the throne thus offered him, that four French ships of 74 guns are now off Pensacola, and were about to sail for the neighbourhood of Vera Cruz, where another 74 had already arrived, and that these forces were to support the party about to declare in favour of the infant.

It is impossible for us to decide on the degree of credit that ought to be attached to this rumour. It does not appear wholly improbable to those who are aware that there is an intrigue on foot in Mexico, the object of which is a change of the government; it will appear still less improbable when we reflect that France and England will regard with a favourable eye any political change that may tend to put an end to the dissensions to which that country has so long been a prey and give stability to the public institutions, which according to the view of those two powers can never be accomplished except under a royal form of government. Whatever may be the doubts on this subject, it cannot be denied that curious events have occured in relation to the Mexican question. An expedition was lately preparing at Havana, about which, public opinion was divided. Many persons supposed it was destined for Mexico.

We cannot long remain in doubt; the first arrivals will cast light on the subject. In our next we shall hazard some reflections on it.

The Hon. James Buchanan has been re-elected U. S. senator from Pennsylvania, for six years from the 4th of next March. There was no regular opposition to Mr. B—he received 85 votes—the rest were scattering votes.

FROM HAVANA.

By the schooner Liberty, captain Gavit, which arrived here on Saturday from Havana, we have received dates from that city up to the 13th instant, inclusive. The papers afford us nothing new relative to the situation of the island and the expedition against St. Jago de Cuba.

Dates from Santander of the 24th October had been received at Havana, by an arrival from Spain. They state that the Carlist bands under the command of Sanz, are in the most destitute condition. The governor of Old Castile, had issued a proclamation, calling upon the inhabitants of that province to be active and vigilant in every thing that might strengthen the arm of the executive.

In Granada seventeen prisoners taken from the Carlists had been shot: they had belonged to the band of Gomez, who continued his exertions to procure a suspension of hostilities with General Alaix, with a view to commence a negociation: Alaix persisted in refusing.

The dates from Madrid are up to the 20th: the third sitting of the deputies was held, but nothing of importance has transpired.

For what concerns the present condition of the Island of Cuba, we have hardly any more information than before. A private letter of the 13th inst. informs us that the city of Matanzas would depart from the allegiance of Queen Christina, and declare against that Queen, should the amount of the appropriation in sugar and coffee from the shipports of Trinidad and Matanzas, from January 1st of December 10th, in the years 1835 and 1836, according to the expedition, the whole quantity of sugar exported to the United States, is as follows: in 1834—70,842 hogsheads; 1835, 114,661; 1836—114,726. The quantity exported to all Europe was, in 1834—399,911 hogsheads; 1835—393,416; 1836—363,726. The quantity of coffee exported, is as follows: to the U. States, in 1834—11,238,000 lbs; 1835—16,840,000; 1836—18,304,000. To Europe, in 1834—14,650,000 lbs; 1835—14,429,000; 1836—14,736,000.

In what regards the exportation of coffee, the table is really curious. In the three last years, the exportation of this important article of commerce to the States exceeded the exportation to the whole of Europe by 4,665,000 pounds.

To the U. States,	40,490,000

FIRE AT AUGUSTA, GEO.

A slip from the Augusta Courier of the 20th instant announces that a fire broke out there on the morning of that day, by which fifty houses were burnt to the ground. Amongst the buildings lost are 16 stores, the rest shops, dwelling houses, &c. The fire, which at one time threatened to spread over the whole city, was stopped by blowing up several houses and by a fire proof building. The loss is estimated at $60,000.—Insurance on the property lost had been made at Augusta, Charleston and Hartford, Conn.

CONGRESS.

We have received by way of Baltimore the report of the sittings of the 15th and 16th inst. We find nothing important except a bill to be presented by Mr Clay on the Monday following, for the distributing of the proceeds of the sales of the public lands, and to grant lands to certain States.

The most important subjects before Congress were a bill to establish a foundry in the West—second reading. A bill to amend the judiciary system—do. A bill to prohibit the sale of public lands to other persons than actual settlers. A joint resolution had passed both houses appointing a committee to inquire into the causes of the fire at the post office.

LATEST FROM BUENOS AYRES.

By an arrival from Buenos Ayres, we have received newspapers up to the 8th of October

From Montevedio, we have official accounts from the General-in Chief of the army, Ignacio Oribe, of the victory obtained by the Constitutional army over the Anarchists, on the 19th—in which 1400 men were routed: 400 horses and 150 prisoners taken, and 200 persons killed

Indian wars it appears are waged in South as well as in North America.

A despatch dated Puntas de Arroto-Tapalque, Oct. 1st, to the Governor, from Col. Pedro Ramos states that the force under his command had routed a division of Borgnese Cabjan Indians, who, at daybreak on the 1st had surrounded the Toldos of the friendly Indians, robbed them of their horses, and bore away captive the major part of their families. The Colonel states, that as soon as he received an account of the affair, he proceeded with some cavalry and friendly Indians in search of the enemy. Having overtaken them, they did not wait for the attack, but charged Colonel Ramos's force with the greatest intrepidity, drove the annoyed with the recent triumph they had gained. They were however, repulsed, and attacked in their turn, but they made a brave resistance, and held their ground for nearly three hours, although repeatedly charged. At the end of that time they retreated, and were pursued and cut down for seven leagues, when the pursuit was discontinued in consequence of the weiness of the ground from heavy rains and the jaded state of the horses. Only a few of the Indians escaped, more than 200 of them were killed, and all the families and booty they had taken from the friendly Indians, recaptured. Colonel Ramos's force was 26 wounded. The Indians had engaged who killed their principal Cacique, and several inferior chieftains.

Mr. Mandeville, His Britannic Majesty's Minister Plenipotentiary at Buenos Ayres has recently recovered from the effects of the fall he had a short time since from his horse

Don Francisco Xavier Rosales, Charge d'Affaires of Chili to France has arrived in Buenos Ayres on his way to Europe.

Two military officers, Aquino and Carrabejal, who had been for some time in confinement in the guard vessel Saraobi, in the Laner Roads, were shot on board that vessel.

No tidings had been received of the brig General Dibeaud, the Colonel Manuel Pinto with about 100 men was on board of her. It was thought they would return to Peru, unless the crew should rise as in the case of the Montezuma.

FROM CHILI.

The Port of Valparaiso is declared open by Government from the 20th of August to vessels of all nations, all internal disturbances having been quelled.

"El Interpreter," a Chilian paper, contains some very severe strictures upon the political conduct of General Santa Cruz, President of Bolivia, and General Obando, President of Peru. The former is denominates the Great Judecourt; and speaks in very contemptuous terms of the latter. It is said that General Santa Cruz has designs upon all the neighbouring States, and particularly against the United Provinces of the River Plate; and alludes to an intercepted letter addressed to General Santa Cruz, under date Colonia del Sacramento, 20th August, 1835. The letter it says that this letter consists of seven sheets of paper; gives extracts from it to prove that the object in view was to create a revolution in the Provinces of Jujuy, Salta, Tucuman, Catamarca, and Cuyo, in order to form into one state; and adds, that the Jacobinists the execution of this plan, Governor Rosas, his Government and political principles, are depicted in the epistle in question, in the most odious light, and that it also asserts that public opinion would favor the projects of Santa Cruz.

DESTRUCTIVE FIRE AT WASHINGTON.

Passengers who reached here yesterday at noon by the rail road from Washington, state that a fire was discovered about three o'clock yesterday morning in the large brick building occupied by the General Post office, the Patent Office, and the City Post Office, the whole of which, together with the principal part of their contents, fell a prey to the flames. The following authentic information touching this serious calamity was received by the Post Master of this city:—

Extract of a letter to the Post master at Baltimore.

Dear Sir—I have just returned from the ruins of the General Post Office. The fire originated in the cellar of the City Post Office, and when discovered might have been easily subdued—but no water could be procured, I am told, in the confusion, before the whole block, comprising the General Post Office, the City Post Office, and the Patent Office, were completely on fire. All the books and principal papers, I believe are saved.

MEXICO.

GOVERNMENT OF THE DISTRICT.

PROCLAMATION.

THE citizen Jose Manuel Fernandez Madrid, 1st constitutional Alcalde and governor of the District.

The following decree has been communicated to me by the secretary of the department of the Interior.—

The President ad interim of the Republic of Mexico to the inhabitants thereof makes known the following decree.

In consideration of the difficulties which experience has proved to exist in carrying into effect the provisions of the 8th article of the law of the 21st March 1831, relative to the exhibition of private manifests, in foreign ports, of cargoes of such consignment, shipped by the Mexican consul or vice consul charged with the port where the cargo is embarked. In consideration of the impossibility of carrying into complete effect the provisions of the 5th article of the same law, and to those of the 8th article of the 2d of September last, I have thought proper to order that the following general regulations, viz.

1. When foreign merchant vessels shall arrive from ports in which a Mexican consul or vice consul resides they shall bear and present to the consul patent of their flag, according to the terms of the 21st March above cited, signed and sealed by the said consul.

2. Private merchants in virtue of such appointment, according to the terms of the 4th article of the above cited law shall be presented in our custom house as well on the quadrant as in the interior, which manifests shall consist of certificate, signature and oath of the commander of the corresponding couple of this decree.

3. When foreign merchant vessels shall come from ports where no Mexican consul or vice consul resides they shall bear and produce in triplicate their general or private manifests, certified, signed and sealed by the respective chiefs of the custom houses of the ports from whence they come, and on these essential conditions they shall be admitted into our ports or over our frontiers in the interior.

4. The invoices and private manifests in the case referred to by the 2d and 3d articles of the decree must be presented, written in the native tongue, without interruption of division between the contents and the dates, signatures and certificates, even when it be necessary to continue on both sides or to annex additional sheets.

5. No motive any longer existing why either general or private manifests should be exhibited without the respective certificates, it is decreed that the sum total of the invoices presented in the first case, be not a fifth less than five hundred per cent more than the sum and dollars, and the second of that which is printed by the functionaries of the consul: and if the want of formalities shall exist in private manifests, or if there shall be an omission of items or other faults, it shall be punished in the manner indicated by the said law of the 21st March 1831, which is hereby declared to be in full force in all its provisions not contrary to the present decree.

6. The provisions of the preceding articles of the decree shall preserve their full experience three months after their publication in the capital for the ports of the West Indies and the Gulf of Mexico, and six months the rest for all other ports: and up to the expiration of the said periods respectively the custom houses of the said boards and in the interior shall clear out all foreign merchant vessels as they have hereto fore done.

7. I command this decree to be printed, published, circulated and fully executed.

Palace of the National Government at Mexico 4th October 1836. JOSE JUSTO CORRO.

To Don Ignacio Adorno.

And I communicate the same to you for your information and for its execution. God and liberty.

4th October 1836. ALAS, governor of the District; and in order that the present decree may be known to all, I command that it be published in the capital and throughout the district, posted up at the usual places and circulated to all whom it may concern, to the end it may have its effect.

Given at Mexico the 11th October 1836.
