FUR PRESIDENT OF THE UNITED STATES

December, is the rallying cry of the Enquirer. We may admire the gallant spirit of the old helianment but shrewdly suspect that too many storms and clouds are lowering over his political horizon for even his

This is of course mean only in jest, but it is no jesting matter that the people of that island should be altogether depicted of the means of intercommunication with the different At lantic cities. A regular mail between Key Word are ties and wishes of the islanders; but the munificer A mes offers so pitiful a stipend for its transmission, the no one will undertake the contract.

Since Washington Irving's exquisite description of the Boblink, half the New York and New England papers have been discoursing respecting the delicious charister. The Boblink is the same bird which is known in Pennsylvenia as the reced bird and in South Carolina as the rice bird, and is extensed a dainty dish for epicarean palates. The following from a correspondent of the New York American, is said to be a faithful imitation of the Boblink's song. THE NABOS AND THE SIGHT BOY.—The National Guartte relate the following impressive ancedote:

On Monday evining, after sun-down we were walking in the western part of the city, and passed a row or segant houses yet unfainted. The workmen had gooe, and a middle-aged gentleman, as his next suited black indicated, was surreying the structure with evident complacency. He was the owner of those find dwellings. A prior, little, sickly, ragged boy, was underthous called the production of the complacency of the complacency of the complacency. He was the owner of those find dwellings.

The brow of the rich man lowered upon the unhapp child, and pashing him into the street, he said in as gry tone.
