NEW-ORLEANS BEE.

BY BUELL MAGNE & CO.

[illegible]

HENRY CLAY,
OF KENTUCKY.

Nominated for the Presidency, by a National Convention

NEW ORLEANS
MONDAY MORNING JULY 15, 1839.

THE NEW ORLEANS BRANCH MINT.

The explanations which we have given in regard to the [illegible] of the mint are as unsatisfactory as they can be to any disinterested person that the public interests require the establishment. On the one hand we are positively told that the only matter which occupied six weeks of his investigation was an entry upon the books of the mint of a deposit of $200, concerning which a mistake or nothing arose between the weighing clerk and the teller; and all the investigation did not involve the [illegible] of any of the officers or the establishment [illegible] on the other hand, we are told that the investigation [illegible] the whole system of the mint, but that it did not [illegible] to [illegible] any thing about it. Indeed, [illegible] contradictions in these two statements as to the object of the investigation. It is [illegible] to conceive that the Secretary of the Treasury would send a commissioner to investigate the [illegible] of the mint, and that the commissioner should not investigate the system of the institution.

[illegible] to all intents and purposes, [illegible] the mint, and [illegible] the [illegible] of the reports [illegible] to the Secretary of the Treasury. There is only [illegible] of information which we have obtained in this matter, and that is, perhaps six hundred dollars, or which there is no apparent owner. Besides [illegible] and [illegible] we are [illegible], it will be recollected, that the President of the United States [illegible] under the control of a corrupt press. Because they support a press that upholds the corruption, the vices and dissoluteness, tyranny and corruption of the Democratic party, [illegible] they deserve [illegible] and such excuses will others be discriminating [illegible] are too [illegible] enough to [illegible] Simpson has left [illegible] very heavy debts [illegible] and [illegible] light is breaking in upon the people they are awaking from the lethargy of darkness that has enshrouded them, a spirit of enquiry has been aroused among them, and as a consequence they look to the leading press as the only source from which to [illegible] correct information. But it seems that [illegible] at Washington have decreed that they shall not [illegible] that they shall still remain in the ranks and as a means of keeping them there they are to be deprived of all mail facilities. Will the citizens of Simpson submit to this? We shall see. But we believe they will not, and we believe they will manifest at the ballot box their determination never to submit to wear a yoke of such degrading vassalage. If they have the spirit of it they will spurn it to the earth.

BALLOON ASCENSION.—Mr. Clayton, the celebrated [illegible] ascended from the city of Cincinnati at 6 o'clock P. M. on the 4th. He descended safely at Mosrow O., three miles distant, at twenty minutes past seven o'clock.

[illegible] SPECIAL CORRESPONDENT
New York, July 12th, 1839

The packet ship Sheffield arrives this morning from Liverpool. She brings London papers of the 13th, and Liverpool of the 14th of June, being one day later than the accounts previously received. There is nothing new by her. The money market continued to be pressed.

The Mark Lane Express (London) of the 13th, says: "All our hopes are become very scarce in the corn particulars at the stock exchange, and in the foreign market the demand for it has seldom been greater than it was to day. Five per cent. was the minimum given on any stock, but the rate of interest, we observe, varies according to the description of security offered. Such as first rate securities are readily taken at par (England) stock, which has, in consequence sustained a further depression of 1½ per cent. We believe the sales are chiefly attributable to the scarcity of money added to the expectation, which is justly entertained, by many that the directors of the bank of England will not be able to continue to pay even the present reduced rate of dividend, but be compelled to call upon the proprietors to sanction a further reduction."

The Liverpool market remains much as at the last accounts received by the ship Liverpool, under date of the 13th. It is said that the sale of the 12th and 13th amounted to *nine thousand bags* at former quotations for Orleans, all that I can learn there is no change in the market.

Stocks in Wall street have this day experienced a further decline, of more than half per cent. on an average. Many are in fact down half per cent. on the [illegible] of any of the officers or the establishment [illegible] to [illegible] the investigation [illegible] the [illegible] of the mint, but that it did [illegible] to [illegible] any thing about it. Indeed, [illegible] contradictions in these two statements as to the object of the investigation. It is [illegible] to conceive that the Secretary of the Treasury would send a commissioner to investigate the [illegible] of the mint, and that the commissioner should not investigate the system of the institution.

[illegible] to all intents and purposes, [illegible] the mint, and [illegible] the [illegible] of the reports [illegible] to the Secretary of the Treasury. There is only [illegible] of information which we have obtained in this matter, and that is, perhaps six hundred dollars, or which there is no apparent owner. Besides [illegible] and [illegible] we are [illegible], it will be recollected, that the President of the United States [illegible] under the control of a corrupt press. Because they support a press that upholds the corruption, the vices and dissoluteness tyranny and corruption of the Democratic party, [illegible] they deserve [illegible] and such excuses will others be discriminating [illegible] are too [illegible] enough to [illegible] Simpson has left [illegible] very heavy debts [illegible] and [illegible] light is breaking in upon the people they are awaking from the lethargy of darkness that has enshrouded them, a spirit of enquiry has been aroused among them, and as a consequence they look to the leading press as the only source from which to [illegible] correct information. But it seems that [illegible] at Washington have decreed that they shall not [illegible] that they shall still remain in the ranks and as a means of keeping them there they are to be deprived of all mail facilities. Will the citizens of Simpson submit to this? We shall see. But we believe they will not, and we believe they will manifest at the ballot box their determination never to submit to wear a yoke of such degrading vassalage. If they have the spirit of it they will spurn it to the earth.

New York, June 11th, 1839.

The movement of our corporation, in relation to the fire department, although of a local character, yet is of such a character of general interest, because it may decide the political complexion of the city of New York, at the autumn election. In May last they committed the outrage of illegally manufacturing firemen votes, by means of which, Mr. Anderson, the chief engineer, was removed, and Mr. Hoffman nominated in his stead, requiring, however, the approval of the corporation. From that day to the present, the locofocos have shrunk from confirming the nomination, and Mr. Anderson remains in office. Monday, the 8th, was the regular day of meeting for the board, and although there was much business on hand, no quorum attended, notwithstanding the large majority the locofocos have in that body. I refer to it now, as an evidence that those gentry would gladly retrace their steps, if they could, and that they dare not advance.

The impudence of the self-styled democracy, in continually assailing their opponents as *federalists*, has often been noticed. I have been amused, this morning, in reading an account of some of the celebrations on the 4th inst., and one struck me as not unworthy [illegible] We now use to retrospect for a moment. In the latter days of the republic, party lines were so distinctly drawn as not to be mistaken. In 1798 there were no non-committals. They were federalists or they were democrats. In the progress of human events each party had its political society.—There was the Washington society and the Democratic society, and membership of these institutions clearly defined the partizanship of the man. Washington Hall, in the back quarters of the federalists; and that is the house which the conscience keepers of Mr. Van Buren selected for his head quarters. The selection was not accidental; but it is only a trifling incident.

I believe of the numerous *Washington societies* which were established in the United States, there remains only one, and that is in the city of Charleston, S. C. It celebrated the 4th of July and feasted sumptuously. Now, this society, true to its principles, complimented those by whom it is sustained, and, therefore, gave, as one of its standing toasts:

"The president of the United States—*His exposition of his own motives in the recent change of policy, satisfy, and guarantees the perpetuity of the Union.*"

That exposition is in conformity with the doctrines of the old federal school, and this society is perfectly consistent in the compliment. Mr. Van Buren, Van Ness, what would Rip Van Winkle, or some old fashioned democrat of 1798, who hated "*black cockade men*" say, if he should awake from a slumber of thirty years, and find Mr. Van Buren, Van Ness, and the compliment by the Washington society, was at the head of the democracy? What would he say, if he should be told that a new generation had arisen, who had made the Washington society, and the exposition of the constitution "was in conformity with the opinions and views of the Washington society, was a *federalist*." What he who opposed them was a *federalist*? This would be a puzzler for the old democrat. It points out the real position of the two great political parties of the country. A volume of comments would not strengthen the case.

The New Era calls for governor Seward's letter, belonging to accept the nomination of the locofoco convention in this New York. Now I can understand the facts, his excellency does not specify the *sub-treasury* [illegible] but remarks that this will known opposition to the measure of the president, had contributed to promote the views and [illegible] of the correspondence will, undoubtedly, appear in a few days.

The money market *tight*.—Stocks very heavy.—Sales effected at a decline of more than *one* per cent.

THE EXAMINER.

MR CLAY.

This distinguished statesman passed through Cincinnati on the 5th instant, on his way to the falls of Niagara. He was not travel through Ohio, and to extend his journey so far east as Saratoga springs, before returning to Kentucky. It is his intention, he understand, to go out as a private citizen, and to avoid as far as possible, every public testimonial of respect and honor.

The Cincinnati papers speak of Mr. CLAY, as looking in excellent health.

We acknowledge the receipt of a pamphlet containing the proceeding, speeches, &c. in the recent trial of John Gibson for libel. The pamphlet is neatly printed and will no doubt prove an instructive and agreeable publication. We have not had time to examine its contents. It is to be had at the office of the True American.

The steamer Chochuma, arrived yesterday from Shreveport, bringing from 250 to $200000 in gold bullion belong ing to Mexican traders to Chihuaha on board.

☞ The Governor has offered a reward of $500 for the apprehension of King Holstein, the murderer of John W. Moore.

☞ During the celebration of the 4th at Cincinnati a young man by the name of Thomas Doughty, while in the act of charging a piece of ordnance, had both his hands blown off at the wrist, and one of his arms broken above the elbow.

The governor of Mississippi offers a reward of $300 for the apprehension of Nath. H. Pegram, accused of the murder of Green Speights, of Hinds co., Miss. Also a reward of $200 for the apprehension of James McCaleb, who murdered Cillian White, of the county of Lowndes, Miss.

Two hundred skeletons of aboriginal races have been discovered a few miles from St. Louis, lying side by side, under a mountain of earth.

A fire occurred in New York on the night of the 10th in a frame house in Madison street. The flame spread with so much rapidity that a woman sixty-five years of age, had no time to escape and was consumed. Two lives, who escaped by jumping out of a window in the second story, were seriously injured.

The French steam ship Meteor arrived at New York on the 13th, two days from Norfolk.

The N. Y. HERALD mentions the appearance of *yellow fever* at quarantine, by the pilot boat Lafayette, from Havana. One of the crew, named Lockwood, says, died in the city, and another is dangerously ill.

A fire broke out in Charleston on the night of the 11th, in King street. It was, however, soon got under. Incendiaries it is supposed, are again at work in that devoted city.

ONE HALF OF EASTPORT (MAINE) DESTROYED BY FIRE.

A fire broke out on the 6th at this place, and destroyed one half the property of the town, comprising more than *forty-one* places of public business. It commenced in No. 3 Water street, was going off every building on both sides of the street, to the store of the Messrs. Hobbs.

Every where in the neighborhood was closed except the two stores at the lower end of Hayden's wharf—Central wharf, Union wharf, Seaborn wharf, and Hobbs' wharf. Two vessels, the Martha and the Abigail were totally destroyed, having been aground in the dock, and several others took fire, but were extinguished.

The list of sufferers is numerous, chiefly merchant dealers in West India dry goods, flour and corn, but stores jewellers, tailors, shoemakers, and every species of mechanics. The ship of the Eastport Sentinel says:

Nothing remains of what was yesterday the centre and in fact nearly the circumference of the business part of the town, but a heap of ruins, above which and over which the smoke rests like a pall, as if to hide the hideous mass beneath. Since writing the above, a estimate has been made of the property destroyed, which is put at $220,000, of which $80,000 are supposed to be insured.

ONE DAY LATER FROM ENGLAND

By the arrival of the packet ship Siddons, capt. Britton, from Liverpool on the 14th ult, we have received Liverpool papers of that date, and London papers to the 13th, one day later than each city than our advices by the Liverpool.

In the house of commons on the 12th ult. lord John Russell gave notice that he should move the third reading of the new Jamaica bill on the 14th.

The Times says that numerous numbers of petitions had been presented against the government system of national education.

The French ministry received another signal defeat on the 10th, they were on Monday, in the powerful [illegible] respecting the proper [illegible] of M. Mauguin relative to the legion of honor. "An occurrence," observes a correspondent of the London Times, "in a land where the [illegible] of honor is the most [illegible] instrument of government, is naturally considered to prove that the ministry has not much influence over it, and consequently no strength."

The Queen has [illegible] further four articles in the propose bill, which directed that the appointment of the grand council whose duty it would be to see that the conditions prescribed by law concerning the conferring of the order were observed by ministers should or should not stand part of it.

It was considered all but certain that the chamber of deputies would reject the proposed bill of ministers to authorize a loan of 5,000,000f. to the company which had undertaken to construct a railroad from Paris to Versailles by the left bank of the Seine—an impression which had produced another and serious fall in the shares of that company.

Treaty of war between the Porte and the Pasha of Egypt.—The London Times states, on the authority of the Constantinople letters, that

A special has the Turkish navy presented a most formidable appearance than at present. No less than [illegible] men (and soldiers to act as such) are employed. These circumstances led to the conviction on the subject expected good and immediate [illegible]

Our letters, says the Times, then proceed to state that Sedar Pacha, who two months previously had Hafiz Pasha, and the [illegible] at Jeddah, under Hadji Ali Pasha, returned on the 8th of May, and on the following day had his report before a grand council held at the Porte. *The particulars were transpired, but it was looked upon as certain* that *at or a deliberation of six hours the majority of the council were of opinion that war should be declared against Mehemet Ali, without delay.*

Trade is stated to be in a woful state of stagnation in the Levant. During nine months, says the Times' correspondent, no sales of any consequence have been made by any mercantile house in the Ottoman capital."

Accounts from Spain state that serious apprehensions were entertained for the tranquility of Valencia, Catalonia, &c. during the electoral struggle about to commence.

The Pacha of Egypt has just sent several rare animals, including a remarkably fine tame lion, as presents to the French government, for the managery in the Garden of Plants.

HIRAM POWERS.—A letter from Florence, Italy, informs us of our friend's health, and eminent success in his profession. He has completed three marble busts, which are enthusiastically admired by all the Italian artists that have seen them, and he has five others in a state of forwardness, besides having modelled nine *easy busts*. He is freely offered for every likeness he undertakes twice as much as is paid to any of the Florentine sculptors. We have been informed that Batolini, an artist of considerable eminence, observed to a friend, on their visit to Powers' studio—"I know not what he may do when he comes to work on *statues*, but for *busts* he has not his equal in all Italy." The marquis de Camponi is a nobleman esteemed as of the first rank in Italy for learning and talent—he is one of Powers' frequent visitors, and observed, on seeing the bust of Daniel Webster—"It is the greatest head I ever saw in my life." These things, gratifying as they may be to Hiram Powers' intimate friends, are not trifles in a national point of view. America—the western back-woods of America—has the honor of sending to the classic soil of Italy, an artist, the acknowledged superior of any that country can at present boast of, and the model of a head, the manly and intellectual propogions of which excite the admiration of the most talented and learned observers. The following extract will doubtless interest our readers, as it [illegible] out the real position of the two great political parties of the country. A volume of comments would not strengthen the case.

The New Era calls for governor Seward's letter, belonging to accept the nomination of the locofoco convention in this New York. Now I can understand the facts, his excellency does not specify the *sub-treasury* [illegible] but remarks that this well known opposition to the measure of the president, had contributed to promote the views and [illegible] of the correspondence will, undoubtedly, appear in a few days.

The money market *tight*.—Stocks very heavy.—Sales effected at a decline of more than *one* per cent.

THE EXAMINER.

"In a few days I intend to begin my first statue, and then will come the trial, for then I shall have to stand on my own legs. I shall have no "lions" before me—the copying of those faces with tolerable accuracy requires a noble effect. All, so far as expression goes, will spring from my own judgment. You shall hear, from time to time, how I get on. It will be an attempt to illustrate Goethe's *Tasso*, and the scene—her reflections on death, as one of the consequences of her transgression. If you have ever read the work you will remember it. A dove flew dead at her feet, which has, supposing it first began to awaken, left me at least convinced of the true state and meaning of it all, and this is the moment which I have chosen."—*Cincinnati Republican.*

New York, June 11th, 1839.

The movement of our corporation, in relation to the fire department, although of a local character, yet is of such a character of general interest, because it may decide the political complexion of the city of New York, at the autumn election.
