CITY AFFAIRS.
The Maron, Mr. Garon, as Salurday last, refused to administer the path of office to Mr. Perzan and cond ward of the second manicipality. His reasons for so refusing were, we understand, that Mr. Loca ETT had violated his oath of office, by receiving a fe which that municipality was a party, when he was a acted inconsistently with his obligations of office transactions which occurred prior to the election, an

was dictated by a most exaggerated conception of his powers, which neither usage nor common sense will justify. No interpretation of the just powers of the Mayor can make him the keeper of the consciences of the members of the council, nor can his opinion be considered as final upon any question of the infraction of their duties. Did the matters in dispute a mount to such a breach of official, duty as would warrant th ejection of those gentlemen from the council, proceedings should have been had against them whilst they were in office. But so far from those matters being a valid reason for the Mayon's refusal to swear them is after the late election; it is clear that had they been impeached and turned out of office, a subsequent elecbeen impeached, and turned out of office, offered for re-election to the very parliament from which they vere ejected, and being returned by a majority of the the government, at a time, too, when they were no over scrupulous of the people's rights, dare to obstructhem in so doing. A breach of duty, granting, for argument's sake, that there was one, cannot be cited to cil; unless there is a positive law which makes the de-linquent forever ineligible. It matters not what the against the Maton. The point of infraction of daty the see paid. The Mayon, by refusing to swear Mr LOCKETT, has prejudged the case at law. And should the plea at law be decided against Mr. LOCKETT, no Putting the case in the most favorable ligh ation which the Mayon's course has created. It is matter which requires serious deliberation—for an exercise of power which deprives a citizen of his con stitutional privileges, or the people of their right to se-lect their own public servants is of so grave a charac-ter as to demand the utmost deliberation in its treatment. We view this question more as a matter affecting public liberty than the individual interests of the senegraed. All interpretations of power which militates against the soverelignty of the prople should the eccutinized accerely. The Mayon's decision con. flicts with the rights of the people of the second ward o the second municipality to select the two gentlemen in question to take charge of their interests in the

This morning at half past twelve o'clock, a fire broke out in the lower story of No. 148 Chartres street, between St. Louis and Toulouse streets, occupied by Mr. Ezekiel Tailor. Owing to the promptitude of Company No. 7, who were first on the upot, and the others who came in shortly ofter, the flames were instantly extinguished. Very little of the contents of the lower story were as ed.

Hushington, April 2d, 1840.

THURSHAY EVENINI,

This was the day assigned for the consideration of the
majority and minority reports from the select committee on
the public printing. The first branch of the subject, embracing the rates of charge for gainting, &c., was reported
upon some time ago by the majority and minority both. On
the second branch, namely the propriety of separating the
printing of the house from the political press of the country,
the minority have prepared a report, and were waiting to minority have prepared a report, and were waiting sent it,—but the majority not being ready with their r

the minority have prepared a report, and write waiting to present it,—but the majority not being ready with their report, the minority withhold their's for the present.

On Monday before last, Mr. Garland of Louisiania offered a resolution declaring it expedient and proper to separate the public printing from the political press:—and instructing the chairman to report a bill accordingly making appropriation for erecting a building in which to execute the printing, providing suntable materials, procuring a superintendent, &c.

The chairman (Mr. Black.) moved to strike out the whole of this resolution, and substitute another declaring such a separation between the public printing and the policies of the public printing and the policies.

Mr. Black has had ien days to prepare a r-port giving the reasons for this opinion; but he is not yet ready.

After some conversation on the subject, this morning, during which Mr. Graves proposed or sequire the committee to report on the question of a discover between the political press and the profit of Tracking a siter next—on as to give alumnant time to the chairman to bring in his report.

ADMIRAL IN THE NAVY.

On metion of Mr. King, a resolution was adopted, in structing the committee on narel affairs to inquire into the expediency of creating the runk of Admiral in the navy of the United States;—and of limiting she number of other officers in the service.

On motion of Mr. King, a resolution was adopted, instructing the control of the United States;—and of limiting she number of other officers in the service.

On motion of Mr. King out from the appropriate bill the samp ropose for a board of visitors to West Point.

After the disposal of some private bills; the senate then resumed the consideration of the bill providing for the continuance of the Cumberland road, through the states of Obio, Indiana, and Illinion.

The debase on the great question in the senate, as well as in the house, has been unausually able and spirited. The opposition will omit no device to defeat it. The truth is, the administration is opposed to the work, while some of its friends in both branches are identified, in interest and feeling, with the post of the deministration of the opposition to the work have been met with much ability is the same the post of administration and consequently opposition to the work have been met with much ability to the surface of the different speeches. It has the manace, this week by senators farerable to the work.—The subject is one on which so much has been said and published, and is so generally understood that it is unnecessary to give notices of the different speeches. It has been ally discussed in brief speeches by Messar. Clay, Wobster, Freston, White and Smith of Indiana. The reply of Alabama, was a most abia had spirited answer to the observed and the surface an
