DENTRY'S PORTABLE FRENCH BURR CORN MILL.

These Mills possess many important improvements over all others ever offered to the public, and will grind from six to eight bushels of meal per hour, and have superseded all others where they have been introduced. They are highly recommended for grinding, can be conveniently attached to and operated by negroes in a plantation, and are constantly on hand and for sale by the subscriber, No. 3 New Levee.

J. MACVEIGH

EDWIN'S PORTABLE STOCK MILL.—These mills will grind from 15 to 30 bushels per hour of corn in the cob, coarse or fine, by this method of feeding stock and poultry, and are now in use in Virginia, Kentucky, Ohio, and other parts of the Northern states, where the saving of feed is estimated to be 33 per cent, for sale by subscriber, No. 3 New Levee.

J. MACVEIGH

NEW CORN SHELLER.—This article will shell so bushels per hour, separating the corn from the cob and leaving out the chaff all by the same operation, and is a very simple machine, constantly on hand and for sale by J. MACVEIGH, No. 3 New Levee.

CLUB'S PATENT COOKING STOVES CALLED "QUEEN OF THE WEST."

THE undersigned, agent for the sale of this article, for the Southern States introduced to the notice of the New Orleans public the large sizes respectfully to solicit public attention to the article.

He refers to the subjoined flattering testimony as to its economy and excellent quality for baking and roasting. With the subscribers, having used for some time Gould's Patent Cooking Stove, called the Queen of the West, feel pleasure in giving an unqualified testimony in its favor. For neatness, convenience, economy and general usefulness, we think it surpasses any other cooking apparatus we have seen in use. It seems to be so constructed as to secure the greatest possible use of fuel with the most perfect combustion, and the same time heated unit really and equally over the whole surface, and the heat being placed over the fire brings the heat immediately in contact with the boilers, so that it performs all the different offices of boiling, baking, roasting, &c. with the smoothing irons at the same time and with the least possible quantity of fuel. We believe the different sizes manufactured seem capable of supplying the wants of all families from the smallest family to the largest hotels or steamboats.

COUGH REMEDY—Pectoral Paste of Degenestais, Drug gist at Paris.—Of all the remedies now known for the cure of coughs, none has ever obtained so much celebrity as the Pectoral Paste, of veal liver. The happy results obtained by its usage in the affections of the lungs and consumptive habit, have rendered it invaluable.

This paste has the power of calming irritations of the lungs immediately, facilitates the expectoration, and stops, in a few days, the most violent coughs, whether dry, hoarse, &c., which yield immediately to its effects. Physicians of the best standing in Paris have tested its effects in many cases of consumption, and found its use in all cases to prevent rapid progress, soothe hoarseness, and cause of consumption as the best remedy now known.

The above remedy can be obtained at M. Martin's, Druggist, No. 171, Chartresst.
