MARINE INSURANCE—THE MUTUAL SAFETY INSURANCE OF NEW YORK,
Zebedee Cook, Jr., President.—A Perl, Vice President.—J P Collins, Secretary. With a capital of near $30,000 dollars all invested in bonds and mortgages in this city.

THE system adopted by this company, divides all the profits of the year, pro rata, among those insuring with it. In no case does the insured receive any further sum, than his premium paid, except in all cases, at the close of the year, without any regard to the amount of loss, paid them, a scrip, entitling him to an equal per centage of all the profits of that year in which scrip is issued, is transferable at pleasure, but not redeemable until the expiration of the charter; an annual interest, however, is paid on the same in money.

The undersigned, agent for the above Company, is now empowered to make Insurance on all marine risks—on specie, merchandize and freights.

By sea in sums not exceeding 15,000 dollars.

FIRE PROOF IRON SAFES.—There can be no greater evidence of the high estimation by the public of Wilder's Patent Salamander Safe than the fact, that since the introduction of those Safes and their subsequent trials and tests, almost every Safe made for the purpose of holding books and papers are called by the makers and vendors by the name of Salamander Safes.

The following gentlemen composed a Committee of Merchants at the trial of safes in a blast furnace near the foot of Wall street, and decided in favor of Wilder's Patent Safe which was the only one that stood the test; viz:

Messrs. W. WOOD & SMITH,
" BALDWIN & CO,
" MINTURN & CO.
" CHAS. H. MARSHALL, Esq.

Wilder's Salamander Safes, which have never failed to preserve their contents in case of fire, are to be had only of

DR WATSON'S OFFICE

OF the diseases to which we are all liable there is one of a certain description, which those who suffer from disease have treated in a manner as private as possible—in the adoption of this course they have been actuated by those who are connected with the complaint, that they can find an office at 119 Customhouse street prepared to receive them, a physician in constant attendance. The method of cure is the result of twenty years practice. The cause of complaint has been well known, but many there are who when they do come under the care, are much at a loss where to apply to for relief, owing to the modesty of the sufferer in not knowing that such physicians as attend exclusively to the practice among families have little or no experience in the management of such affections as these. And indeed, it is a fact, that there have been individuals who have patients themselves how much pleased they were to have found his address that he no longer has any doubt how useful it is to advertise the public in this manner, at what price they can be cured, and the speedy relief to the treatment of the disease they suffer from, who by many years experience and study, has made himself master of it, as well as by attending to no other practice.

Doctor Watson has been in this place eight or nine years and a great many on whom a "delicacy" of a "particular" kind had been brought on from different causes. What these causes are is best known to patients themselves, and what the deplorable state they are in for want of sufficient vigor, excess of irritability, wasting, or other conditions of the parts. But it is enough to know that the disease in the cause may be, or whatever the effect, Doctor Watson has had ample experience to pronounce him the confidence of his patients.

The office is very conveniently situated, having separate entrances, and hours so arranged that patients never more than one at a time. So many may be observed as the case requires, and as to the confidence that may be reposed in the doctor himself, there need not any thing be said of that. j17

DOCTOR WATSON, No. 119 Customhouse st
Office open from 7 in the morning until 9 at night

DR. BLANCHARD, ex-Dentist to their Majesties of the King and Queen of the French, Surgeon Dentist of the Faculty of Paris and that of New Orleans, has the honor to inform persons suffering from bad teeth, that by means of a peculiar process he repairs the carries which the teeth have suffered by caries, restoring them to their soundness and strength; they are rendered serviceable in mastication, and often last during the period of natural life. No metallic substance enters into the composition of the plugging cement, and it is absolutely harmless than any other substance hitherto employed. Its properties are such that any one only in a few minutes be enabled to plug any one of his own teeth. This cement, soft at first, solid in the course of an hour, quite hard in three hours, becomes in a few days as hard as the teeth themselves. Once in place in the carried cavity of the teeth, it is fixed beyond escape, and of the same color as the tooth, which when plugged, lasts a long while, and can be employed in chewing as well as any of the sound teeth. The operation causes no pain and is over in a few minutes.

Dr. Blanchard will undertake the plugging of teeth, or if preferred, the cement may be purchased from him, as it can be inserted by the sufferer himself. This offers a signal advantage for persons residing in the country.

Recently invented for plugging the teeth, a gold preparation without any alloy, more malleable and perfect than any hitherto employed.

A new fusible metal (platina) for plugging the teeth.

DENTAL SURGERY.

Minute attention is paid to every thing concerning the wholesome condition of the mouth and its appendages—plugging, extraction, &c.

Artificial teeth inserted from a single tooth to an entire set. These teeth are a perfect imitation of the natural ones, whose places they supply, assuming mastication and elegance, and facilitating the pronunciation.

Apply at his office, corner St. Louis and Bourbon streets, every day from 9 a. m. to 3 p. m.—Sundays excepted.

SOLAR LIGHT—SIDEREAL LIGHT

THE NEW SYSTEM OF LIGHT invented by M. Gaudin, whose experiments have been successful as to its force in the Brooklyn government navy yard, has produced itself superior in all previous observations. The light produced is so brilliant and powerful that at a mile distance, objects can be distinguished as well as in day light. For light-houses, steamboats and the lighting up of the city this process would be invaluable.

Mr. Dubin, sole agent in the United States offers his services to the public, for the introduction of this new species of light, which offers so many advantages over the others.
