WILLIAM W. THOMPSON'S PATENT IMPROVED LEADEN PIPES.

THE manufactory residing in St. Louis, Missouri, invites the attention to the excellence of his leaden pipes made by a new and patent process, (to which he has the exclusive right in the entire district of country in the west-ward of the Alleghany Mountains,) of a better quality than can be produced by any other known method.
The new patent pipes are remarkable for the uniformity of thickness, the accuracy of the bore, the perfect polish of the interior surfaces, the absence of scales and flaws, the very long length without joint, for its small weight of pipe. These advantages will be evident to any body upon examination.
Besides the usual sizes from one-eighth to five inch in bore, he manufactures also, for the use of farmers and others, leaden pipes for conducting water from spring at long distances under slight pressure or head of water, and for other purposes.
