In relation to the expediency of increasing the military defences of the country

War Department, Dec 29, 1845

Sir. I herewith return to you the resolution whele you sent to me on the 23d unet. The recommendations in my report to the President of the 29th all have reference to a permanent peace establishment. Under any circumstances, I am convinced that our seacoast and northern frontier should have a larger force stationed on them than they now have, or the depayment can now place there by any proper disposition it can make of the regular army at this time. The number of troops now in Texas, cannot, under present circumstances, be lessened. There osglund to be less, indeed I think there should be more troops on the Indian frontier. Should the suggestion in the report, to increase the rank and file of companies to saxy-eight or eighty-four privates, be approved by Congress and carried out, there would be a dispossible regular force for the forts and fortifications on thances of an apprehended attack. Heades, it would require some monts to rause the men, in the old regiments and get them in position. Should thus suggestion meet with laws, I stail think that authorny should require some monts to rause the men, in the old regiments and get them in position. Should thus suggestion meet with laws, I stail think that authorny should require some monts to receive the method of the control of the c

to assell that fronter if hostitutes from that quartershould be reasonably apprehended. There are at its that the mean and the proper series are to call in the aid of the unitua for the defence of the country, to drinn the trops required by the acceptance of volunteers, rather than by the present mode of mixing a requirement of the executives of the states and leaving it to dean to raise the number required by the acceptance of volunteers, rather than by the present mode of mixing a requirement of the countries of the states and leaving it to dean to raise the number required by the raise mode would be volunteers. Volunteers would be taken to the more flow number required by the arising mode would be volunteers. Volunteers would be taken to the more follow service when first called out, than draughed mutitation. I would respectably to the volunteers of the great of the service o

dally other show of opposition had been previously minde by a party of 30 or 60, who having met the army in the Prairie, informed Gen Taylor that he must proceed no further in that direction. By order of Cen TT the, army opened and the party were permitted to murch through to the bear, and then depart.

When mear Point Isabel with the Diagonic Gen William of the more and message from Gen Meja filled with threats in the usual style of Mexican according to the bear and the beat of the triding and message from Gen Meja filled with liveus in the usual style of Mexican according to the service of the Party of the Point Isabel with threats in the usual style of Mexican according to the party of these words as to allow a resort to them from the Conflagration mode in the following the department of the party of the party

Mallard and adopted the same triple to the progression of the city of Latay, the same triple of P. Mallard and adopted and adopted and adopted and adopted. The rules being dispensed with, it was their read a third time and posmed.

Mr. Vason called up the bill to regulate the Treasurg Department.

Mr Printers followed taking a similar view of the mabeet.

After some further discussion the bil was postspoused. The bill to organize District Gours was at the suggestion of Mr Mors, postsponed until the bill could be printed. Several other bills and resolutions were called upbot it appeared upob engager, that none of them were printed. It was then moved that the Committee on Frinting be notrucked to enquire most the reasons of the delay. Mr Sakutton from the steller Committee in which was referred the subject of the Public Printing, report of an act fixing the compensation of the Public Printer.

Mr Mosts moved in statement.

Mr Meist, moved its adoption. The House could know nothing of the subject, but it had every coin denies in the Committee Mr Sanitous said that though he felt obliged for the confidence reposed in him, he trusted that the bill would be printed and properly extrained.

Mr Sarria agreed with Mr Moist. This subject had been a long while before the House, and the members would be no better acquainted with it, after than before printing.

The bill was read a second time and taken up by sections.

The bill was read a second time and taken up by sections.

Mr Saxpipor explained the principles upon which the bill was framed; The Committee had consulted a namber of practical printers in regard to the several time and Lad, in every instance as firs an practicable, struck an average between the highest and lowest extracts which had been furnished.

Mr Daxw corroborated the remarks of Mr Saxpipors. He though the compensation in general very fair, though one or two items appeared to him sures some published in the state Paper Mr Daxw and days, 15, 26 2 2 cent due on year of the intensity law.
