There were over 150 persons on board the Enter use, at the time of the explosion. The boilers had was in good order. No one has been able to statche precise manner in which the accident occurred. A dreadful riot broke out, on the 31st ult. among one volunteers on a steamer at the encampment opposite Burita. Five companies of Georgia volum ers were on board; among them an Irish company ome time existed. After a good deal of bickering and mutual reproach, two of the companies got into a regular fight, in which pistols, muskets and swords vere freely and fatally employed-a number of mer ay as many as twenty or thirty. Besides these, it is neved that 8 or 10 men were thrust or thrown over ad lasted some time, the colonel of the Georgia re ment finding his utmost efforts to quell the out break fruitless, called on Colonel Baker, of the 4th regiment of Illinois volunteers, for aid. That officer anediately ordered out companies A, and G., and the mean while put himself at the head of a squad of 20 men, and rushed upon the rioters. The latte were at first driven back, but rallying, overwhelme the 20 men, wounding eight of them.—Colonel Bake e 20 men, wounding eight of them. hunself, while fighting desperately, fell from a musket buil in his neck, which influted a dangerous wound; at this critical moment, Captain Roberts of company  $\Lambda$  arrived and ordered his men to charge. While

eing his way up the steps of the boat, he received thrust from a bayonet which entered the lower par of the neck and passed through his back. He was empelled to retreat, taking the body of Col. Baker ong-on obtaining a supply of ammunition, Captain Roberts returned but found that that the conflict had cased. The moters were compelled to surrender surmed and securely guarded. It was stated, observes that journal, that Col. Harney, with the troops at Bexar. had crossed the Rio Grande at Laredo and thus proeeded to the place in question without advising t ommander of the movement; but despatches ha een received from him, within a few days, dated a: San Antonio; so that knocks the affair out of the pale of probability. of a terrible disaster on the Rio Grande. The steam er Enterprise left here about nine days ago for Ca argo, having on board a large amount of Govern ient stores, and Cant. Wood's company of infantr om Houston, Texas. When about 35 or 40 mile above Reynoso, she bursted her two boilers and kil led and wounded some forty persons. It was impossible to gather the full particulars from our informan but from what I could learn, about sixteen perso were immediately killed. The Captain, Pilot and Engineer of the boat were either amongst the killed or wounded, as also was Capt. Wood. There was ore damage done from the fragments of the boil than from the steam, as she had very little water he boilers at the time.

Gen. Worth was going ahead towards Montered and his men were in the highest spirits.

A lawyer has been arrested and is now in contine nent at this place, for endeavoring to incite the lexicans to insurrection.

MATAMOROS, August 25th. MATAMOROS, August 25th.
There are a number of proclamations in town dated the 5th inst., from the city of Mexico, declaring
the present Government at an end, and re-enablishing
the Constitution of '24. I have not been able to get
one of these documents but have conversed with several persons who heard it read. The pronunciamento in the city of Mexico is said to have been one of
the most unanimous acts. eral persons who heard it read. The pronunciamento in the city of Mexico is said to have been one of the most unanimous acts on record, and was made before Paredes was 25 leagues from the place. It abolishes the present Congress, and declares Santa Anna the person best fixed to organize the new one. It particularly recommends him as the leader of the tarmy, as they say the war will, under his guidance, be prosecuted more energetically and with greater abinity. This last I am inclined to place but little reliance in, for, as much as they might desire an honorable termination to the war, they are not anxious to gain it by the chances of another hard flought field.—As soon as the news of the pronunciamento reached Tampico, the Commandant of that post immediately prociainned for Santa Anna, and all the soldiers, with a large number of citizens, and civil officers followed him. Comeze Farias is said to have been the master spirit in bringing the change about.

The Congress of Mexico, sometime before this movement, had become more pacific in their tune towards the United States, and although it may all be possible that in their action against Paredes they did a speak of Santa Anna as being more capable of carrying on the war, it may have been for eflect, as it is well known there is one class of men throughout Mexico, who could never have been induced to join in the revolt unless they thought it would further that object.

Notwithstanding the contradiction of the Union is spit, and the judy of inquest rendered a version of the produced and the profit of the produced and the profit of the contradiction of the Union of the produced the

well known there is one class of men throughout Mexico, who could never have been induced to join in the revolt unless they thought it would further that object.

Notwithstanding the contradiction of the Union about the arrival of an agent of the Mexicans at Washington, it is believed here to be true. A letter of a late date from Mexico received here intimates that a gentlemen, who was formerly high in office in Mexico, had gone to the United States, and the writer says he is sure his visit has something to do with our Government. The opinion gains ground daily that there will be no more fighting.

It is impossible to ascertain the number of killed by the dissaster to the Enterprise. A bost come down last night, and reports having passed 6 or 7 dead bodies in the river. There were a number of volunteers cooking near the boilers at the time of the explosion.

Nothing from Camargo worth communicating.

That the poor relinquish the services of their children in order that they may attend school. That all understand in what manner they should co-operate in the works of the school.

That the children be free from independent and lawies habits in order to bring to school, that confidence and application which are independently and including the said that the Public Schools of the First Municipality offered a problem more complexited than any other place; that, founded in January.
