MR. PAINE'S DISCOVERY. We have, from time to time, published va rious statements touching an alleged discovery by Mr. Paine, of Mass., of the means of procuring i ght and heat through the decomposi-tion of water by electricity, at an exceedingly small expense. The scientific world seem greatly divided in respect to the real value of Mr. Paink's statements tallacious, upon the pleasure, and of obtaining thereby, at a barely tranght with the most interesting and important results to the covidered world. But the ques-tion is, has Mr. Paine made such a discovery? This can only be answered by testing it in so

This can only be answered by testing it in so concineive a wale, as to leave no doubt what lever in the profile mind.

We learn from the N. Y. Tribine, that such an experiment is now on food. Arrangements are in progress for lighting the Astor House by this process, and it is expected that the trial will be made within a month, as soon indeed, as the machine can be prepared for the purpose. That establishment is now highted by gas male by the proportors on the premises, and has no connection with any gas company whatever. The popes and burners now used are periodically adapted to burn Mr. Patak's carbonated by drogen; all that will be necessary, will be to detach them from the present apparatos and purchased them from the present apparatos and other gentlemen, and collision of trick with he misposible. Every means will be taken to distance a tair trial, all the parioes being an exercise of success as Mr. Patak or his friends can be. It is succeed, the thing will be entablished. If it fails, that will be the end of the affair.

In case of full, and entire success certain respectable and responsible pattices have agreed to purchase Mr. Patak's patent right. The conditions, according to the Tribara, are that Mr. Pervey polal bring a machine of the fervice.

Mr. Clay leave to the thing will be established. If it fails, that will be the end of the affair.

HOUSE.—The flouse met at 12 o'clock, an went into committee on the California question; Mr. Boyd in the chair.

The chairman stated that the following we the penting amendment to the amendment of the compromisions as the southern boundary of California.

"Provided that it shall be no obstacle to the admission into the Union of any State, while may hereafter be formed out of the tertitor lying south of the parallel of latitude of 36 deg. 30 min., that the construction of said State was

on, and decided in the negative—ayes 76, neer 89.

Mr. Seddon introduced an amendment to the Missouri Compromise proposition of Mr. Green of Mo., as follows: "And at the time of its adoption intended and understood as a partition for the fature, between the slaveholding and non-alaveholding States, of the Territory of the fund States, to the utermost extent of its weakern limits, and as such was enacted mainly by the votes of the representatives from the non-alaveholding States."

A debate of an interesting and exciting character arose on this amendment, in which Mesers Seddon, Brown of Miss. Carter, Venable, Baker, Meade: Stanton, Toombe, Wintrop. Thompson of Pa, Duer, Hall, Hartis of 1-1, and McCienuand took part, when at 4, r. M., the committee rose and the House adjourned.
