

REPORT SUPERINTENDENT OF PUBLIC EDUCATION

To the Honorable the Members of the General Assembly of the State of Louisiana.

The several laws which have been passed by the Legislature during the past year, in relation to the public schools, have been the subject of my personal inspection...

With a view of drawing as full information from the Parish Superintendents as possible, I addressed to them upon coming into office, a circular, directing them to report to me...

The general condition of the schools is good and improving. Many who were formerly ignorant and illiterate are now able to read and write...

Unfortunately, we have no large school fund. The amount raised by law for maintaining such a fund, is the ten per cent of the net proceeds of sales of public lands...

My observation and reflection leads me to the conclusion that the present employment of parish superintendents is as cheap a mode of administering the fund as any that could be devised...

The annual table presents a condensed view of the state of the public schools, and shows the number of pupils, as compared with that of the report of Jan., 1890...

QUESTIONS.—What is the whole amount of school districts in your parish? Answer.—Twenty-three, one of them however, called Prairie House and Carriere, is not in the parish...

QUESTIONS.—How many males? Answer.—179,000. How many females? Answer.—179,000. How many children of both sexes? Answer.—358,000.
