15. None respected.

16. None respected.

17. Our teachers are generally well qualified to teach, some but such are employed, and they are hiso payatase of acceptable steeps character.

18. Our Cestige analyses sovieted male and details a meadantise are design well, for the past they exhibit on the part of the intender and pupils, competency, efficiency, and strict attention to study. The public signal is faits parish, is alive to the intenset of exhibits on. But I am soury to say that the system of free anchors in our State is accomplishing little for the education of the masses. The supervision of parish flaperintendents over the qualification of teachers, is certainly producing a reform in that quarter.

But the fund provided by law is entirely inadequate to pay more than one fifth of the expenses of tuition for hea year.

It is impossible to get working men to take hold of the directorship, for the want of means to work the system, and consequently the system, though a good one, is necessed either with indifference or diagrast. The directors neglect their quarterly reports because as, they say, there is nothing to report, Hence the imperfection of my answers to the above questions, it is no fault of mine.

(Signed.)

D. PIP No. 3.

11. The excess of expenditure over receipts, for the maintenance of public schools, has been provided by the Council by taxation.

12. The amount paid at tempty-five techciers, whose salaries range from thirty-five to sixty dollars, making \$1500 a seatth, and \$14,000 a year.

13. No building has been exected during the time above mentioned.

14. No school-house parelineed.

15. Nies school-house known to \$2000 to \$2500 a year.

16. One thouses deliars.

17. Their literapy qualifications fair; their moral character exectings.

18. The general consistion of our schools is very good; their progress through the past year highly saliefactory. The fature prospects of one schools, is a specuniary point of view, are unfavorable and discouraging. The naunicipality being greatly entances will, with great difficulty find means to pay rests, family hooks and estationery, defely incidental expenses and complete the amount reconstry to pay teachers' salaries, which the State appropriations do not meet in full.

(Signed,)

M. ESNARD, Trensurer. 11. There never has been any District tax raised in the Parish of any amount. The citizens of each School District generally, contribute of their own free will to the building of their action losses, which are of cheap description, but answer all purposes, mostly made of logs. What the costs of the buildings are, I am mable to say, there is no notice taken of such contributions. There is no such thing as realing school houses. Furd and intriture are supplied in the same manner and no notice taken of the costs.

12. For education good, some of them possess qualifications far above the ordinary school education, but such are not always sober men—but I may say of moral character generally every good. REPORT OF THE SUPERINTENDENT OF MOREHOUSE. REPORT OF THE SUPERINTENDENT OF MOREHOUSE.

cet the present school system is a bad one, and too much expense in keepin REPORT OF PARISH SUPERINTENDENT OF CARROLL.

PROVIDENCE, Nov. 27th, 1851.

Hos. Robert Carter Nicholas,

Superintendent of Public Education.

Six — Immediately after the receipt of your Circular of August 13th, I repeated the call upon the several Directors for the information required; but few compiled. I have been compelled to visit some of them, at a distance of 30 miles, as often as four times, without succeeding. It is very difficult to obtain the services of competent Directors. Those of the comminanty, that are competent, are unwitting to devote their attaintent to the subject, consequently the amount of good accomplished is much less.

There are 7 Districts in the Parish.

All have School houses and Schools.

During the prest 12 minutes there have been 15 Schools in operation.

Spelling, Reading. Writing, Arithmetic, English Grammar, Geography and History, are the branches taught in most of them.

Agreeably to the last enumeration, there are 501 children of both sexes in the Parish. 251 males and 250 females.

230 males and 150 females have attended School.

The whole amount of Holl Tax roceived to June 30th, 1851 is \$882.00.

Received during the year ending, June 30th, 1851, 184 is \$882.00.

Received during the year ending, June 30th, 1851, 1901 Tax \$300.

There has been no Histrict taxation for any purpose.

Pand for tuition from 180th September 1850 to same date in 1851 \$2,747.10.

No public money has been expended in that parisd in building, purchasing or relating School houses, or supplying them with furniture, &c. Those expenses were generally sustained by privide contributions.

The Teachers have generally a good education and good moral characters.

Many of the Schools languagh for the want of means; but considerable good has been accomplished. Migh have learned to read and write sufficiently to transact the ordinary bounces of them a short time.

A better spirit is appearing in the community upon the subject of education, and I am induced to believe, shat in a short time, those that are compete REPORT OF PARISH SUPERINTENDENT OF CARROLL. I refer you to my report to the Grand Jury of this Parish, I requested the Editor to send you the paper.

Them is a powerful opposition to the system in this Parish, we could overcome it, had we the means to pay inachers a fair compression for their time all the year. District directors ought to be limited in the amount of ralary. They my teachers per year \$600, making it necessary that they should at least have 30 children attending acheol. If the Legislature could pean a law of this kind it would prevent much abone. The 23d, section of the school haw is delective, because at does not give the district tax when levied the force of an executive. The directors in the district where I lived, levied a tax to build a relució isone. Some of the planters refused to pay, a unit was the consequence. The directors lost. Owing to one of their resolution not being deted, the Attorney against them bounted that no 3 planters ignorant of law should be mended to make the proceedings of disectors legal if they acted in good faith, and that it should not be anoutled for want of form.

Yours Mespectially, JAMES CETER,
Superintendent of Public Schools, Point Coupee. I refer you to my report to the Grand Jury of this Parish, I requested the Editor purpose.

Of the sixteen schools, three are English, and thirteen French. In the English schools, the text books and system of instruction are, in the mails, as in the achole of New Orleans and the Northern States—say in New York and Masanchusetts. I enclose a copy of regulations suggested to the various achoul districts, drawn from different sources.

WINCHESTER HALL. REPORT, PUBLIC SCHOOLS, PARISH OF JEFFERSON. 2 Six. comprising ten districts.

3 Six.

4 Gretna academy comprising the 1st, 2nd, 3rd, and 4th districts in which is spelling, reading, writing, arithmetic, grammar, generaphy, history, and composit the other schools are taught the primary branches.

5 Six hundred and forty three of both sexes..

5 Six hundred and forty three of both sexes..

7 200 males, 285 females.

8 Ten mooths, two vocations of a month each.

9 Of the mill tax, \$3.404 50.

10 Of the poll tax, \$3.50 00.

11 There has been no district tax. The Police Jury of this parish appropriated of dollars, to pay the balance due; in 1849 and 1860 to teachers, and there has been at 500 dollars raised by voluntary subscription among the people.

12 \$3.771 43.

13 Six hundred itollars.

14 Three hundred and six dollars. WINCHESTER HALL. (Signed.) REPORT OF PARISH SUPERINTENDENT OF LAFAYETTE.

1 Ane., 9. Question 2; answer, 1000. Question 6; answer, makes 544, and 456 females. Question 5; answer, 1000. Question 6; answer, makes 544, and 456 females. Question 5; answer, 1000. Question 6; answer, makes 544, and 456 females. Question 7; answer, 257 makes, and 97 females abend school. Question 6; answer, this question is difficult to answer. The schools cost one in each district, without cessation, until they are closed by default of the teachers. Question 9; answer. This question and the 10th I canset answer, and having received the necessary papers, a when I came into office, to show that information. The Auditor of Public Accounts could give you that information. Question 11; answer. The directors invariably fail to make out and deliver to me their annual reports. except one or two districts, by which only I could ancertain that information. But from common report, I would any about eight thousand sollars. Question 13; answer. I did not receive any papers when I have paid since the first of February last. Question 13; answer. I do not receive any papers when I have paid since the first of February last. Question 13; answer. For this, again, I need the annual reports of the directors. It would not be far from it to say about aven thousand dollars. Question 17; answer. For this, again, I need the annual reports of the directors. It would not be far from it to say about aven thousand dollars. Question 17; answer, good. Question 18; answer. The general condition is very good, considering the limited state of education in this parish, before the present system of free public schools went into operation. The number of children who roceived instruction before the present system defective as it is, has swelled the neutore to condition the processor system of the solution of the present system of the solution in the consencement, a surplus of funds accommutated, which has bept up our achools in time condition up to the present time, and perhaps will until the unfo REPORT OF PARISH SUPERINTENDENT OF LAFAYETTE. REPORT OF SUPERINTENDENT OF THE PARISH OF
PLAQUEMINES.

1 Quee. What is the whole number of actual districts in your partiel? An., 1
2 Quee. What mumber have selected houses and actuals? Ans. All have school citive operation. Behan houses are rested in all districts but one, and in that, not house had been erected previous to the institution of Public Schools, and is feed for public sechon jumpones. Three hundred and six dollars. One hundred and fifty dollars, fifteen cents. The teachers of ull our schools are of good moral character, qualified of an English common school. 18. Amount part for trition from 30 Sept. 1850 to 30 Sept. 14. Nothing.

15. Five hundred and sixty-three dollars and thirty-three cents.

16. Two thousand two handred and five dollars.

17. Only three teachers who possess the highest literary qualifications and unexceptionable character, are employed in the Lafayette public schools.

18. The general condition of the webools is prosperous, The progress of the schools thus far, has been satisfactory, their numbers increasing stendily, and there is every prespect that the usefulness of the public schools will constantly exsend. NEW ORLEADS, December 29, 1851. Hon. R. C. Nicholas,

State Superintendent of Public Education: Hon. R. C. Nicisolas,

State Superintendent of Public Education:

Dean Sta,

J. A. Durel, Treasurer of Municipality No. One, having communicated to me certain queries relative to the Public Schools of this Municipality, I take pleasure in answering as many as I can, from the official documents in my presentes.

There are twelve schools in the First Municipality. To those schools all the children residing within the limits of the municipality may be admitted, without regard to the particular district or ward they reside in.

There are two Primary Schools for girls.

One do for boys.

One High School for girls.

One One High School for girls.

One One High School for girls.

Three do for boys.

One Night School for male adure.

The balance are rested at an avange of about fifty collars per month for each school, exclusive of repairs, etc.

I cannot state how may children of the legal age reside in the municipality my official information being confined to the whote number actually in the achoels, which is us follows, for Lecomber, 1851:

Males. present, by which this end might be obtained.

I have just returned from a tour of inspection of our Parish Schools, and have ot report a more invourable condition of them this at this period last year. Besiden the sum accuming from the State (which is here too small to keep up the nehooth) I have obtained in each district, small voluntary statisfactions which will for the present keep thou in operation. In several instancies these contributions have been received from a persons who are not paronts, but when have been presupted to this course by a since a parameter of the present state of the present state of the present of the Nebools.

The condition of the Schools at present are generally in a promising condition. A majority of them having heretofore proven equal to the accomplishment of the object for which they were established, and their efficient operation, promises like results for the future. The great and apparently only difficulty with which the most of them have to contend, is now what it has ever been, an insufficiency of school fands. This has in many districts proven a serious draw-back on the operations of the School system, and its consequences have in many portions of the Parish rendered the system quite supportant. REPORT OF THE SUPERINTENDENT OF MADISON PARISH. ankles, Suspending, Ledles Rags of every sees on, controllement while Presence, cutton-sterile cere fields, from 5 to 200 a piece, also printed in one; Dunferfields, pissis and figured farancie, heatings and laties Hent, Velveffor dieves, an event long article needed by the index. EIP Free Manual Orennaeste and Recalit. E. R. I. FANCI. R. C. Nicholas, Eagr.

Dury Sirre—It is now some time aims I received your request, to make out coport as to the condition of the schools in Madison Parish. This I was maximum to de and had so contemplated; but I found synall umble. After receiving gotton from you I made frequent demands apon the Divisions of the various Relaced Ridgitates on Parish, for reports from their sevent Districts, upon which to fernish a general report to you. My collectations have proved in vain, so that I now find it too him to feverally you anything that may be really valuable. However, as anything in relation to the matters tray be gratifying to you, I have concluded to sond you cannot be related to the matter tray be gratifying to you, I have concluded to sond you cannot be related to the matter tray be gratifying to you, I have concluded to sond you cannot be related to the matter tray be gratifying to you, I have concluded to sond you cannot be related to the matter tray be gratifying to you, I have concluded to sond you cannot be related to the matter tray be gratifying to you, I have concluded to sond you cannot be related to the matter tray be gratifying to you, I have concluded to sond you cannot be related to the part of a primary nature.

The superposule reports shown, that for this year the member of children of has once of the lugal ago, is two hundred and eightly-three; lead your k was thank has Richmond, La. Navember 20th, 1251.
