W. Comment BY MAGNETIC TELEGRAPH. [TRANSMITTED TO THE M. O. DEE] (By the Southern Line.)

Mr Williamson professed as much retreach med as my other gentleman on the floor, but he did not consider it a proper way to carry out retryncement, when it did not reach all other officers in the State. He was in favor of cutting off all uselessedflices. Without meaning any discoveriety to the Menake, or to the advantage of retreachment reform, he would, with the view of testing the sense of the House, move to key the whole bill on the table.

Mr Schly remarked that although the State of Jonician paid the highest sainries in the Union, yet she did not always get she best tallent. The Supreme Court precessed a most is mentable example of the fact. The State paid the very highest sainries as these placed, and yet every lawyer will declare that the bench the yet has been been taken be least talent of any that he had not always get the best tallent.
