A body of San Salvador and Quantemalean troops is said to have reached Leon, and to be swalking reinforcements before commencing operations against Warram.

Disjournation relations between the United States and Ricaragua have been resumed.

The exequator of Mr. Manning, British Consul at Lacu, has been reveked for alleged intermedding in the internal affairs of the republic.

The Nicaraguanes, of the 9th, says:

In coming up the river, Brigadiar-General Fry informs us that six Costa Ricans were taken prisoners at the mouth of the Serapiqui. They represent affairs with our neighbors as very deplorable, indeed. The army of the State had fallen off to the buddered meen, and those being paid to script, were deserting every day. A general poverty prevailed, and the state of the singer.

The same paper, of the 3d, has the following:

These men were proved to have attempted to bribe soldiers of Walkers's army to desert.

Lours Sonassenson.—It is removed that Mr. Soblessinger, after dodging about the country for three months, has at fast "turn-ed up." in Chianndega, and has been ap-pointed to the command of a body of Indians pressed into service for rebellious purposes against this republic. It is a pity the good-matured indians of Segovia should be forced to keep such bed company.

The Caharba was awaiting the arrival of Capt. Scott from Granada. He had gone thither for the purpose of consummating the arrangement between Gen. Walker and Mr. Morgan relative to the Nicaragua route. The Caharba was to sail for New York immediately on Capt. Scott's solure.

The California news is succincily embraced in the annexed summary of the torinight's news: Since the sailing of the last steamer. July 21, we have to report a condition of continued prosperity in all the great leading interests of California. Trade during this period has been stradily improving, larger quantities of goods having gone forward to the interior than during any two weeks for months previous. Both steamers and sailing vensels running on our rivers have been freighted to their utmost capacity, merchandise, in many instances, having accumulated upon the accounts are encouraging, as will be seen more fully by reference to our mining news and the condition of the continue of the co EUROPE. THE AFRICA'S NEWS. The mail steamer Africa arrived at New fork on the 20th, with dates from Liverpool rade, was about to make a tour in the Uni ted States. It is now rumored that he incharged to adjust unofficially the existing Central American difficulties.

Our Liverpool correspondent states that I this be true, the selection of Mr. Lowe a Apparently the most important item of news is the circumstance that difficulties have arisen between Rassis and the Allies, respecting the adjustment of the boundaries assigned by the Treaty of Paris.

The occupation, by the Russians, of the lale of Serpents, is the principal subject of discute. Lie of Serpents, is the principal subject of dispute. In consequence of these misunderstandings, the whole of the English fleet remaining in the East have been ordered to concentrate in the Black Res. to "superintend" the execution of the 20th article of the Treaty of Peace.

A dispatch, via Berlin, states that the Bussian Minister, on his way to Constantingule, is charged to effect an adjustment of these matters.

From Spain we are almost destitute of news. Baragons submitted quietly, and O'Donnell does not seem to have ventured on severites.

The whole of Spain is, according to government accounts, tranquil, but it is true that

BRITAIN.—The Queen has issued the following address to the army:

the British soldier; and the events of the war have proved that their national virtues have not degenerated during a long previous peace.

"The Queen deplores the loss of many of her best officers and bravest men; but history will consecrate the ground as the grave of heroes."
