L. MILLER'S
HAIR INVIGORATOR,

AS EFFECTIVE, SAFE AND ECONOMICAL COMPOUND FOR RESTORING GRAY HAIR to its original color, without dyeing, and preventing the Hair from turning gray.

FOR PREVENTING BALDNESS, and curing it, when there is the least particle of vitality in the roots of the hair.

FOR KEEPING SCURF AND SANDRUFF, and all miscellaneous affections of the Scalp.

FOR BEAUTIFYING THE HAIR rendering it soft and silky in the fullest and readiest manner.

The great durability and the unequalled demand for this unrivalled preparation, notwithstanding the numerous worthless counterfeits, is sufficiently convincing to the public of its high quality and merit. It eradicates the most persistent Dandruff or Scurf, and by its cooling, healing and purifying properties, promotes the growth of the hair, even in cases of long standing baldness, and also where the hair is falling and thinning, it will give strength to the roots of the hair, and restore the growth in those cases where it becomes bald, causing it to grow a fine and beautiful head.

Numerous certificates of ladies and gentlemen in New York who have used it, can be seen at the office of this paper, to which the public is respectfully invited to call. It has also been awarded the highest premium at the late Fair of the American Institute, and at the World's Fair in London in 1851. Sold by druggists and fancy dealers throughout the United States and Canada.

## Preservation of the Sight.

MR. C. SURAMEL, optician, late of the Hotel Dieu, Paris, has the honor to inform all those whose sight is defective that he has established himself in this city, and is duly qualified, approved by the most renowned oculists in Paris, and Drs. Bennet, Francisco, Cremeroe, Roe and Warren, of this city, that he will be able to find those glasses can be used without the least danger to the most delicate eyes.

The most skillful opticians have made a report declaring that the above-named gentlemen are unquestionably the best for the preservation and improvement of the sight.

Their superiority over all others consists in the fact of being entirely divided into two lenses, the one placed facing in the center only, as in the case with spectacles and glasses generally. The interposition of the two cylindrical curbs makes these lenses achromatic, and consequently much clearer than the others.

Those lenses are a decided improvement in the optical science.

Persons obtaining the advantages of these new glasses will be exhibited and explained, on application to Mr. Suramel, at his house where may be purchased at long credit, or for cash, on the lowest terms. jy11
