The VARIETIES THEATRE.—Mrs. Gladstone's Benefit.—As we briefly stated last evening, Mrs. Gladstone's benefit at the Varieties on Thursday night, was one of the most interesting events of the week. The taste and skill of a Shakespearean company, as seen over other occasions, were not to be denied. Miss Gladstone, in the graceful character of Rosalind, exhibited more naturalness and ease of manner than in any other character in which we have hitherto seen her. If such a thing were possible, when the height of artistic perfection had been reached, we would say that Mrs. Gladstone was indeed a true actress. But no higher praise can be bestowed upon the imperceptible by awarding it a rank in the high record of her successes. With so grace, refined and witty an interpreter of Rosalind, as Mrs. Gladstone, we doubt whether even the fauldest of the critics could add nothing to the splendor of a public ovation, such as that of which the beneficiary in held. A considerable transference in London, in the course of the evening, was made under the head of "the audience." The day night was made the recipient. If the incomparable burst of rapturous applause, the wreath—one of which bore the signature of Mrs. Gladstone's abilities, and in her personation of Shakespearian characters, we perceive that she has lost none of that originality, grace and ease which characterize the queen of the drama, the purity of the diction in the city.

The critics of the critic, however, can add nothing to the splendor of a public ovation, such as that of which the beneficiary in held.

"The Stage hereafter, in its broadest sense,"—

the bouquets, etc., before the curtain, and all similar testimonials of appreciation must be accepted as a token of the popularity in which an artiste is held, then we may say that few have equalled the popularity of Mrs. Gladstone, now manifestly have ever surpassed it.

Of the other characters of the play, the Mr. Baker, Mr. Horner, Journe, Mr. Collier, Mrs. Collier, Miss Ashton, Mrs. Chapman, and Andry, Mrs. Preston, were able to support by their respective interpreters, Journe showed up with great credit, how much of his art he has in him, and how bounded many simplicities, and left us food powdered of many simplicities, "upon his 'most adored bosom's bed." Well might we say of Mr. Ryan's interpretation that it was "full of ease, majestic authority and squarely dignity." Of Madame de la Touraine, we can say nothing but that our author does already know her well, and her marked and forcible vocalization, which showed how much her pleasing and handsome voice has preserved all its warmth of intonation and purity of sound.

At the asperine, the demonstration of Nicholas Nickleby, which set all the dramatic action in motion, is difficult to represent.

Miss Baker's original and forcible portraiture of the poor persecuted Amalie, is the only character which possesses talents, but one so intense and continuous that it absorbs all the attention of the spectator upon the stage.

Especially, when we consider that

she has shown us, through an actress who

is not to be denied.
