The robeid Gaptral Stanth is recorred by prisoners to have had a very burrow escape during the fighting of Sunday. A shell from one of our batteries excluded directly over his brind, killing several persons in his immediate vignity.

Convention organized in Rochecter, on women day. Mise Harriet N. Austin was to have presided, but Dr. Jackedo stated that she declined the promoter research, and the Doctor was chosen to fill her place. The object of the reformers, which is to hadeen the women of America to adopt the Blodmer coatume, was argued by several of the delepates, among them Mire. Lydia Sayre Hashronck, M. D., who told the audence that "durit at the prevalence of the camp bever and typhont, she performed her from testonal duties up to the day of the birth of her hast child, and some members of her own family were not prepared for lits advent. In a short time she signia assumed her position." The disturcin was continued yesterday, but the result has not yet reached us.

A. Scott for his attentions.

O EDITOR OF THE ERA

It has been ascertained beyond a question that, when the davairy darb was made at Aldie last Weduseday, the enemy had but just arrived in that vicinity.

M. jor Fairias, Inspector General of Long-street a staff, had become with the family, while the side at Aldie, but half an hour when he was horred away by the sould of the gons of corresponding tones. He escaped by following a bridle path over the monature. Others of the rebel army who live in that vicinity had equally short visus at home and like narrow escapes from eapture.

short visits at home and like narrow eccipes from explure.

Morely, with his guerrillas, made a dash at a small wayon train passing up the little giver turnpike on Monday. They had succeeded in destreving two wayons, when General Birney, with his staff and cavalry eccors of about thirty men, cane upon them, opatering a half a dream of the sing and putting the rest can ignimization route. Some of them were abeliered in a born by the randede, from which they fixed upon our men, but from which they make your party was injured in the skirmish.

A Dry Spell.—All the courts having gone into summer vacation, except the Provost Courts, it is very hard now adays to get up a local column. It is up use for reporters to say now, there's a chief amank ye takin' notes, and faith hell prent em'. so if there be no murders, rapes, or some other disbolical transaction, he's on his 'beam ends,' and he can only pray that Providence will permit something to bappen which will give him an item that is not contraband.

A New Uniform for Coloned Troops—Considerable ideconion is being excited among medical men in regard to the uniform of the colored regiments. Many of the profession claim that their having ply yield nature and the fact that meny of them are to be used in the entreme South, demand an oriental uniform like that of the original Zynave d'Afrique. It has been urged upon the Recretary of War to substitute for the tertaight jacket, well adapted to the Manthery white colder, the loose, well twant atinte for the straight jacket, well adapted to the Marthern white soldier, the lonce, well wentilsted oriental uniform.—N. A full account of the engagement, given by a correspondent of the Philadelphia Lagurer, describes the tropedo at rangement attached to the bow of this valoaties of the price. The writer agys:

It is evident that the rebels have taught us a prod lesson on the torpedo and the learn. It has been a question how a torpedo dould be sately carried in frost of a vessel without the learn. It has been a question how a torpedo dould be sately carried in frost of a vessel without the learn. It has been a question how a torpedo dould be sately carried in frost of a vessel without the learn of the Atlanta is opidous until the proper time. The Allanta's torpedo gearing solves the question. The forward part of the ram of the Atlanta is solid iron, twelve feet in length, and so overlaid by etcel bars, with their ends protruding below the cutwater, that a hage steel saw is formed which would cut any wooden ganboat in existence. This ram at its bow end comes to a point, if I may so call it, about two inches rquare.

From the deck of this iron ram just thead of its ignoriant may be a supposed and ready for the explosion. From this case runs an insulated with sonks to ring. In this sockst is firmly inserted another iron boom, which extende beyond the sonkst twenty-eight feet, and at its end is hung the torpedo, all capped and ready for the explosion. From this cap runs as insulated with which the pilot can explode the turpedo is as soon as it was under a vessel. You can be a decreased the carried. The iron ram also is savage enough in its appearance, and wood asaw a hole in a wooden vessel without much difficulty.
