In Philadelphis the removal of McClellan meets with no sort of favor. His friends condemand it, whilst the radicals said it was no time to change commanders in the face of the enemy. Mr. Hurris, Republican Senator of New York, desonunced the remywal in hu upon speech.

Richmond. November 14—The reported removal of McClellan is the tonic of the hour: the matter is still enveloped in doubt and uncertainty. The Exement thinks it scarcely possible that the Administration is wild enough to provoke a direct issee with the majority of the people by metal insult to the General whose name was the watchword of victory.

Death of Dr. Ruskton.—Our readers will have deep regret excited in their minds we are sure by the aunomoment which we have to make the morning, and which is a cause of painful feeling to correlves, that Dr. Rushton died during Thursday light. Destruction of the Baltimore and Onio Ratlkool.—A Harper's Ferry letter states that the recommendation of Governor Letcher to destroy the Baltimore and Obio Bailroad has, as far as I can learn, hene carried out to the full extent from Harper's Ferry to a distance of ten or twelve miles beyond Martinsburg. Beyond Martinsburg, fire have been even at night along the track of the road, indirating that they are like made to the road, indirating that they are like the water stations and other property. This is especially the case at the foot of North Mountain, from whence the rails are also said that they are filling up Parton of the road have also been destroyed, and utter devastation now overspreads this section of the country to a greater extent than during any revious visit of the vandals."

A CHIFFONIER ON THE BATTLE FIELD.—A correspondent writes that he lately witnessed a novel sight of a regular New York chiffonier exercising his calling upon Bull Run battle-field, and at the described camps in that vicinity. He was not one of the small-fry order—with bag on his back and hook in hand—but one of your wholessle chiffoniers, with two horses, two wagons and a colored assistant. The animals were dilapidated specimens of the genns horse, and when not in motion it required a nice discrimination on the part of the nomerous bursards hovering on the field to distinguish between the live and dead horses scattered about. The based chiffonier widently falt some anxiety on account of the frequent approaches of the earrion brief, for he kept a couple of sheepish.

Sooking dogs baying at them. The wagons were worthy of the horses, and were being filled with all sorts of clothing, such as can only be found on battle-fields and in descrid ensign. The shirts, costs, caps and blankets of the herose whose bones lie mondering on the plains of Manasses are to be made the subject of specialing on traffic, and cryst secret a good term as cassimere or printing paper.
