Its protective, preservative and beautifying properties will preserve the whiteness, soundness and natural polish of good teeth throughout life. And when unused, it will arrest decay, and remove from the teeth the stain which decomposition generates.

LECTURE ON ENGLISH HISTORY AND LITERATURE—An interesting and admirable lecture has just been added to the Lecture Institute for young ladies on Camp street, of which Madam Le Roy is principal. This is the establishment of a class of English History and Literature, and of Moral and Moral Philosophy, under the professorship of Mr. John B. Dyer, whose first lecture delivered last Friday evening, was received with great interest by the audience.

We are able to say of this lecture that it exhibits its author as eminently a master of his theme: a true masterpiece, on the surface, dull and sterile to the superficial observer, but rich in elements of thought, historical philosophy, of moral courtesy, even of romance and poetry, to a mind which, by study, reflection, and inquiry, has made him a master of his subject.

Mr. Dyer's lecture upon the treatment of Mr. Lincoln, appeals upon a comprehensive plan under which no linguistic, social or historical fact can illustrate his subject so admirably as to escape; and in sketching the physiology of the English language he reveals much that appears to the physiologist of the English language and etymology by which innumerable American characters and words have largely influenced our language.
