and that the view which some take of the bill some of the some many who believes that this bill does not control to the bill some take the bill some the control to the bill some to the bill some the control to the bill some the bill some takes governments and the girl laws, but that it was passed as a feed some time to the bill some takes give South oas of (Degrees until after the easyst presidential election, and it is thought that the built was made for the purpose of gaining time. We are seed asserted that any measures would have been used to accomplish this sod, however barsh they might be, sail tideded the article plat we repulsished yesterday from the New York Timer distinctly clates that the most sweeping and vundering the measure would be used by the Radicals if necessary. In approar of this view it is urged that seems of the conservative members, friends of the South, sided the passage of this bill because help believed it to be the cheapest way of passing the time required by the Radicals. The total control of the South, aided the passage of this bill because help believed it to be the cheapest way of passing the time required by the Radicals. The total control of the South, aided the passage of this bill because they knew that harsher measures would undoubtedly be employed if this failed. Looking at the question in this light we, have to imbediate cause for fear, but it is by no theam contain that is in the proper one. With a people was have so little regard for logic or congresses on principle pleire is no predicting from any of their acts what may be done in the fitting.
