LARGEST CUT-GLASS VASE.

Biggest Article of the Kind in Existence Is on Exhibition in St Louis.

The largest piece of cut glass in the world, a vase as tall as a man, and as brilliant in every part as the finest small piece, has been completed in Philadelphia and shipped to the St. Louis exposition, where it has been placed in the industrial art display The vase is five feet six and threefourths inches in height, and every inch of it is perfectly worked in sunbursts, chrysanthemums and beaded and notched effects that shed prismatic rays of brilliance and luster. The nunbursts on the star are too large to be designated by that usual cut glass term, so they have been given a new name, the Louisiana Purchase star. In all there are 100,000 cuts or deep incisions on the wase, which required turning it 200,000 times. The vase weighs 200 pounds. It was produced by nine men, who spent 2,000 working hours on it. The man who made the blank is six feet seven inches tall. A shorter man could not have handled the great piece of glass. Twenty blanks were turned our before a perfect one was produced. The remarkable brilliancy of the vase is caused by the fusing- in the class of ten per cent. more lead than is 'ordinarily used. The vase is several times larger than the previous greatest piece of cut glass, completely dwarfing it.

BASKETBALL CIRLS QUIT.

Outlook for Coming Season Is Very Gloomy According to Captain of Eastern Team.

"Our outlook for basketball isn't very bright this year," remarked the captain of the senior basketball team of a wellknown woman's college to a Philadelphia Press reporter.

"Our worst loss is going to be our center, who doesn't return to college this year because she is going to be married. Of course, I can forgive her, but just listen to the excuses the others offer: One girl writes that she can't play this year because the game makes her hands large. and her father objects to that. Another says she can't play because she always a foul on her, and that her mother is afraid she'll become a regular 'crosspatch.' I did expect something better of our goal defender, but here is her realgnation along with the others, saying that she met a girl this summer who had played in that position at Bryn Mawr for three years, and she was such an aggressive, assertive person that she's afraid if she plays goal defender any longer she will become like the Bryn

BROKER'S LUNCH COSTLY. Bells 5,000 Shares to Pay for Mealand Finds That Stock Soars Three Points.

There is a good story told of a wellknown broker, which, though rather expensive to him, serves to illustrate some of the methods which are in vogue during the period when the public is out of the market. In such times, says the Brooklyn Eagle, brokers get practically no commission business and they are simply gambling as much among themselves as if they sat down to a table with a poker layout. The incident mentioned occurred on a day when trading would be called wholly professional. About noontime the broker referred to decided he would get some lunch and that he would go and put in a trade to pay expenses. Consequently he went on the floor of the exchange and sold 5,000 ahares of Metropolitan. He then went to lunch, stayed some time, and, on returning, found that Metropolitan had soared three points. He looked the sitnation over and decided to buy back the stock, and found himself not only out his lunch money, but about \$14.000 besides. Ofttimes, however, it goes the other way.

MAIL MAN BRINGS LOBSTER Gloucester, Mass., Fish Dealer Uses Service for the Delivery of His Wares.

According to the Grocery World, the very latest development of the mail order business is the delivery of fish in this manner. A fish dealer and packer soing business in Gloucester, Mass., announces this as a very large end of his trade. He deals only with the consumer and packs fresh lobsters, crab and shrimp in the proper shape for transmission through the mails, and purports to have sea food delivered at the door in almost any part of the country before it has lost the delicate flavors which are to be found alone in the fish fresh from the water. Not only are the fresh fish shipped in this manner, but salted fish such as salmon, mackerel and rodfish. Quite an extensive trade has been worked up by this individual. He has on his books standing orders to send quantities of fish at regular intervals. mome persine eugaging a regular weekis supily for an entire season.

Charcoal for Wounds At a cost of 25 cents Japanese doctors

can dress the wounds of limiting. They use a fineir powdered charrya, obtained by the slow combust, in if straw in closed furnaces. Sachets filled with r are applied to the wounds, and its antiseptic. and absorbent qualities generally effect a radid cure

Do Away with Prison Stripes Following the abolition of the lockstep.

and the cropped head in New York state. prisons has come the doing away with the stripes on convicts' clothing, and \$,000 suits minus the stripes are being FURNISH HELP TO GOTHAM

New York Has Over Three Hundred Intelligence Offices - Vary Widely in Character.

The intelligence office, as distinguished from employment bureaus, is one which furnishes household help exclusively, is the distinction in Atlantic. Such offices are of great number and variety. New York has more than 300 such offices, and other cities proportionately, while many others combine this with other kinds of employment. They range from wellfurnished, adequately equipped houses or suites of rooms in desirable localities, with good business methods and systems, down to a single room in a tenement, which is the kitchen, dining-room, parlor and office by day, and by night the sleeping quarters, not only of the family, but of any unplaced girls. It is not unusual imsuch rooms to find at night from five to ten people. The office with brownstone front frequently does less bustness than the saloon or underground offices. The former secures its employes by attractive advertisements, keeps records, gives receipts; the latter have runners with pockets full of cards, who accost girls on the streets, steal their pocketbooks, until they agree to go to the address furnished, and fight with each other over girls they claim to have discovered, until the police interfere.

LAY BLAME ON NORTH WIND

South Americans Say Breeze Is the Cause of Diseases, Distemper, Insanity and Murder.

In the neighborhood of Buenos Ayres in South America there is a north wind which sweeps over plains covered with marshes and becomes overcharged with moisture, according to the Chicago Daily News. The effects produced in the human body are in general lassitude and relaxation. The pores of the skin are opened, inducing great liability to colds, sorethroat and all consequences of check of perspiration. The damp wind of La Plata seems to affect the temper and disposition of the inhabitants. The irritability and ill humor it excites in them amounts to little less than a temporary derangement of their faculties. It is a common thing for men among the better classes to shut themselves up in their houses during its continuation and lay aside all business until it has passed; while among the lower classes it is always remarked that cases of quarreling and bloodshed are more frequent during the north winds than at any other time. Even murderers are said to lay to it the blame of their foul. deeds. No sooner, however, does the southwest wind, blowing from the dry and snowy summits of the Andes, set in than health and comfort and peace are restored.

INDIANS INTERPRET VISIONS

Red Men Give Queer Solutions for Visions-Flying Taken to Mean Short Life.

According to Charles Gibson this is the interpretation Indians give to certain dreams: If you are a young man or woman and dream of flying it is a sure sign you are short-lived and it is timeyou were preparing your business to do your flying at some other place. If you dream of flying among the housetops or just above, you will reach the 50 or 60 notch. If you dream that you are away above the treetons, then you are good to live up into the nineties, and if you dream that you are bumping the stars with your gourd-head, then you will reach the century-notch. To dream that you are solid with a black-eyed beauty is a sure sign that you will kill a fine buck deer before you sleep again. To cream of blood means also mear in the pot. To dream of your would-be mother-in-law breaking a bow over your head is a sure sign that you will not be her dear beloved son-in-law. If you dream of eating sofky with a deceased friend, make your will before another sun goes down.

COW ASSISTS AT WEDDING Shohola, Pa., Bovine Remains in Kitchen and Thirsty Guests

Are Made Happy.

A strange wedding celebration took place at Shohola, Pa., recently. Herman Hipsman married Miss Christina Kulm. After the ceremony the couple went to the bridegroom's home, a stock farm, where all the neighborhood had congregated. The stock of beverages gave out and Hipsman brought one of his best Jersey cows into the kitchen. Each person who desired a drink had only to go to the cow. She was a good representative of her stock and did not go dry. although one man was kept busy doing

Oldest Fishes. The oldest inhabitants of the New

York aquarium are the striped bass, which have been there for ten years, having been placed in one of the floor pools before the building was opened to the public. In May, 1894, 55 specimens, weighing from a quarter of a pound to four pounds were secured, 37 of which have survived. Most of those that were lost died in the first year, and in the last four years not one has died.

New Use for the Shark. The shark, which is so abundant in the waters of Central America, is to be utilized in commercial products. company has been formed which converts sharks' fins into jelly and tinned soup, makes fine machinery oil from their livers handsome leather, equal to alligator's, from their skins, walking sticks from their backbones, and numerous articles from their jawbones and

HANG JAP WOMAN FOR SPY

Bussian Cavalry Officer Tells Pathetic Tale of Female Patriot Who Met Beath.

A pathetic story is published in Moscow with the annotation that it was told in the military hospital by a wounded Russian cavalry officer.

"It was during our rapid and unfortunate retreat from Telissu. Two of our Cossacks, pushing forward a dwarf, marched up to Col. Riabinin with the words, 'Your honor, this is a Japan-

"As we had no time for formalities, the dwarf was tried on the spot. There were no papers of value upon him, but those he had proved unmistakably that he was a spy. He was sentenced to be hanged.

"All the time the little fellow, with. a contemptuous look upon his face, kept chattering in good Russian, 'I don't deny it; do what you like!' 'At any rate, they can meet death,' commented Riabinin.

"At four o'clock he was strung up, and, when the poor wretch's body fell from the cart, a little silver chain jerked from underneath his tunic and glistened a moment in the sun.

"An hour later we were sitting together pouring vodka into our tea pannikins, when in rushed one of the spy's captors. 'Your honor,' he shouted, 'it's a woman! We were taking this.' And he put in my hand the silver chain with a sendant locket containing the portrait of an unmistakable European in Russian officer's uniform.

'Good God, what a race of people!" said Col. Riabinin. A terrible silence fell upon us all."

DIES FROM X-RAY BURNS. Chief Assistant of Thomas A. Edison Passes Away a Martyr to Modern Science.

Clarence M. Dally, an electrical engineer, formerly of Chicago, is dead at East Orange, N. J., a martyr to science. His illness was due to experimental work in connection with Roenegen rays. He suffered for years and underwent seven operations, which finally culminated in the amputation of both his

During his experimental work with the X-ray Mr. Dally was Thomas A. Edison's chief assistant. He worked at the laboratory in West Orange night and day. In his work with the flouroscope his hands were badly burned by the rays. Bix months after the first indications of burning appeared the hands began to swell and Mr. Dally suffered great pain for two years, when he went to Chicago and obtained a position with an incandescent lamp company.

Cancer finally developed on the left wrist, and he went east for treatment. More than 150 pieces of skin, taken from his legs, were grafted onto his hands without success. Seven amputations robbed him of fingers, hands and arms.

During the seven years he had been unable to care for himself. All the time before his arms were amputated he was obliged to rest his hands in water during the night to allay the burning sensation.

COMPLETING MINING FEAT. Solution of Great Problem in Hydrau-

lic Engineering Draws to a Close.

One of the most interesting engineering feats on the Pacific slope is approaching completion by the Golden Drift Mining company. A pressure dam containing more than 3,000,000 feet of lumber and thousands of tons of rocks is not of itself a novelty, but the purpose of the power obtained is significant. It solves a problem of great value to Rogue River valley in Oregon. Sufficient water will be furnished for irrigating 20,000 acres besides washing placer ground of high elevation. Sixteen 400 horse-power turbines are to be installed. of which four are now in. Each four turbines operate in tandem two-five-step centrifugal pumps raising 18,000 gallons per minute 430 feet, or 9,000 with pressure equal to an elevation of 830 feet. for mining. Pumps with less steps out

for irrigation. School in Skyscraper.

of tandem elevate great volumes 70 feet

Accommodation for nearly twice as many pupils as any other elementary school in the world will be found in a "aky scraper" to be erected within a few months in New York city. It is planned that the new school shall be ten or more stories high and have about 15 class rooms to the floor. The entire building will contain at least 150 classrooms, accommodating between 7,500 and 8,000 children. The building will be absolutely fireproof. Only the desks and doors will be inflammable. If a fire should occur in a room it could be closed up until the flames had died out.

Odd Election Bets.

With the approach of election some funny bets are being made on the presidential result. One man has wagered that if Parker is not elected he will stand on a cake of ice weighing 300 pounds in his bare feet until the ice melts. The Roosevelt man says if his favorite is defeated he will let his hair grow until 1908. According to another bet, if Parker is defeated, the Parker man is to roll a peanut across the Brooklyn bridge. If Roosevelt is beaten his man will have to get shaved on one side of the face only

Some Consolation. Alas! that there should be only 177 American familles who possess the proper heraldic qualifications for "exalted rank" in the British dominion. But if rank is but the guinea stamp, as Burns says, the dollar stamp on certain American escutcheons will probably continue to pass current at par in titled circles of England.

HORSES RACE WITH TRAIN

Frisky Equines Jeopardize Lives of Passengers on Pennsylvania Road by Queer Franks.

A pair of frisky horses, escaped from pasture, persistently stopped & Pennsylvania railroad express train mear Pottsville, and by running shead of the train in a long tunnel, jeopardized the lives of 100 passengers. The engineer noticed the horses on the track as he pulled out into the suburbs of Pottsville. Appearing to enjoy a race with the train, the tooting of the whistle failed to scare them from the track, and for a long distance the spectacle was presented of a fast train preceded by two splendid horses going at breakneck speed. It was an ideal contest between steel and steam and flesh and bone. Twice the team was stopped and the horses chased away, but each time the animals returned. A tunnel between Pottsville and St. Clair was finally reached, through which the horses sped, with the engine close behind, the whistle screeching continually, a wreck possible if they were struck. At the St. Clair station the horses were still galloping ahead, and it was necessary to lasso them to give the train a clear right of way.

VAST SUM FROM TOURISTS

Switzerland Annually Collects Thirty Million Dollars for Entertainment of Foreign Guests.

It needed a painstaking German to figure for us a set of statistics long demired, but of a sort that nobody cared to tackle the tedium or the difficulty of computing them. These figures are the annual number of tourists in Europe and the amount of money they spend. The German's estimates cover the totals In both items, and, large as their number is, the Americans do not constitute quite the whole of the globe's yearly nomad population. But what quantity of Americane do visit the old world and what amount of money they leave there may be guessed from this German's computations Switzerland entertains through the year 3,000,000 visitors, who spend \$30,000.000. Italy, the Riviera and Spain between them attract an expenditure of \$60,000,000. The various great capitals in all cull \$45,600,600 that come from the pockets of the 900,000 visitors to Paris, the 600,000 to London, the 500,000 to Berlin and the 250,000 to Vienna. The baths and seaside resorts accommodate 12.000,000 guests, who spend over \$16,000,000.

BERLIN NOW THIRD CITY. From Mere Village of a Century Ago German Capital Has Nearly 2.000.000 People.

Berlin, a mere village a century ago, to the third city in Europe, in point of population, and its growth since 1870 has been phenomenal. Yet the technical barriers which enclose the city remain precisely what they were more than 40 years ago, and Berlin is still as it was in 1861, compressed within 28 square miles. At the close of the Franco-Prussian war. Berlin, now the capital of a new empire, became a paradise. Streets of houses appeared almost as if by magic, and the whole aspect of the city became changed. From being the worst lighted, worst drained and ughest capital in Europe, it became one of the finest, cleanest and handsomest of cities, and its population has more than doubled. Berlin now boasts within its boundaries 1,857,000 inhabitants. Greater Berlin might have a population of 2.430.000, with an area at least treble. extending, indeed, as far as Potsdam. Berlin's actual increase from 1800 to 1900 was 818 per cent, multiplying its population by nine.

JAPS USE FANS IN BATTLE Presents from the Emperor Are Handy and May Save Soldier from

the Heat.

The cool and deliberate actions of the Japanese may in part be due to the fans they carry, writes Correspondent Palmer in Collier's Weekly. After describing a flerce morning battle Mr. Palmer tells of their use of fans as follows: "Some infantry reserves near by were fanning themseives. To a Russian who had not tasted their fire these 'Makaki' migh! have seemed quite effeminate.

"The fans which the little men use to cool themselves on the march are presents from the emperor. On them is inscribed, in the handwriting of the commander-in-chief of the army, Marquis Oyama, the words: 'Do your best for your country."

"On a hot day a fan may beat up a breeze in front of a soldier's nose which will save him from succumb-

Tablets for India.

Tablets are to be placed by the British government on buildings in India which are famous in the history of the country. Four of the buildings selected are the houses of four early Christian missionaries. The government thus officially recognizes the fact that the missionary bears the torch which lights the way for explorer, soldier and

Farm Hands Wear White. Farm hands in Yucatan wear linen garments of spotless white. When they become even slightly soiled, they hasten to change them. Work is plentiful there, farm laborers are well paid, and they can afford to be tidy.

Chicago as a Health Resort. Now comes a physician and declares that breathing coal dust is a cure for consumption. We have always held, says the Chicago Journal, that Chicago is the greatest sanitarium in the world.

HUNT MEXICAN 'TREASURE

Search Being Carried On in Texas for Vast Wealth Buried During War.

A number of Mexicans with teams, plows and scrapers are excavating in that vicinity, claiming to have in their possession maps and charts showing treasure to be buried there to the amount of \$100,000 in Mexican doubloons. The treasure is buried near what is known as the Bull Tank, and the party has agreed to pay the owners of the land on which they are at work a certain per cent of the find for the privilege of excavating. This treasure is said to have been buried during the Texas and Mexican war. It is said a tradition has existed that a large sum in Mexican doubloons was buried somewhere on the banks of Poud oreck, and another that there was areasure of considerable amount in Mexican money baried at some point along the banks of the Brazos river near Marlin Many evcavations have been made to locate the buried treasure, both on Pond creek and the Brazos river. There efforts were not only made by home people, but strangers have gone in and excavated, among whom were Mexicans. A few years ago it was no uncommon. thing to see deep holes dug along the banks of these streams, presumably by parties in search of the lost treasure, but if any money has ever been found in this manner the fact is not known.

Hardest Task of African Missionary Is to Persuade Dusky Na-

SAVACES DESPISE LABOR.

tives to Work. The hardest task of the missionary among tropical savages is to teach them the dignity of labor. Where every bodily want is supplied froely by nature, the chief motive to work, the earning of one's daily bread, is absent. But the lesson is being learned. This was shown some months ago in Toro a central African country lying to the west of Uganda at the foot of the snow-cladrange anciently known as the Mountains of the Moon. The king's birthday was celebrated by an exhibition of native work. There were 200 entries, a smaller. number than the previous year, but the standard was much higher and the variety greater. The queen who was herself a prize-winner, presented the prieza. and the king showed much interest. Yet

ten years ago, when the first native Baganda missionaries went to this people they were sunk in the lowest depths of savagery. In some respects, this exhibition in the heart of the dark continent was more interesting and remarkable than that in St. Louis

FEW SNAKES IN NEW YORK Copporhead and Rattier Are the Only Poisonous Species About the

Great Metropolis.

Over the country extending for many hundreds of miles both north and south of New York, the same embracing the Adirondacks, the Catakill and Blue Ridge mountains, there'are but two specles of poisonous snakes-the rattleonake and the copperhead, declares the New York World. The former may be at once distinguished by the raftle while the latter is a reptile of beautiful hues, showing rich, reddish-brown bands on a hazel body-color. The bands are gery narrow on the back and very wide on the sides, presenting the outlines of numerous dumbbell-shaped mar lings. Despite the presence of these personous snakes in the eastern states accidents are of great rarity. The rattlesnake is an honest brute and usually gives ample warning of its presence. The copperarad is a secretive species and generally prefers flight to combat.

LIKENS RUSSIAN TO FLINT.

George Gould, on Return from European Tour, Says Things About the Czar's Subjects.

George J Gould returned on the Philadelphia from a 4,000-mile automobile tour through Europe. In the smoking room of the Philadelphia an American resident of Moscow spoke one evening of the Russian press censorship

"Through this censorship," he said. "the war news has been perverted horribly. Repulses have been changed into advances, and routs into victories. Hence, on the occasion of a dozen defeats. I have seen the deluded Russians, thinking they had won viotories, light big bonfires and caper about them joyously. Russia, when I left, offered the world the spectacle of defeats everywhere and fires of rejoicing everywhere"

"The Russians are like flints," said Mr Gould. "The more you beat them the more fire they make."

Freak of the Wind

Almost beyond belief is the story which comes from England of a trick the wind played not long ago on the spire of a Presbyterian church | It blew the steeple above the belfry some 25 degrees out of plumb, so that the spire pointed in a northwesterly direction and it was feared that it would fall When the next morning men were engaged in straightening it the wind veered around and blew it back to its original position. Of course it was necessary for the men to straighten it and its sunports, but the wind's freak made their work much easier.

Moslem Grave Never Opened. In Turkey a Moslem grave, when onca it has been filled in, is never to be reopened on any account. With a view to remove the faintest chance of a grave being thus defiled, the Moslems plant a

cypress tree on every grave immediately

after the burial, thus making their cem-

eteries resemble forests

ENGLISH LACK IN EMOTION

Instances Which Demonstrate That Anglo-Saxons Have Little Sense of the Ludicrous.

Anglo-Saxons are apt to pride themseives upon being undemonstrative, declares a London exchange Max Adler tells a tale of a boy who was sent out by his father to bring in some wood. The boy took the opportunity of disappearing and did not show his face again beneath the parental roof for over 20 years. Then one evening a smiling, well-dressed stranger entered to the old couple and announced himself as their long-lost child.

"Well, you haven't hurrled yourself." gruntiled the old man, "and blarm me If now you haven't forgotten the wood " I was lunching with an Englishman in a London restaurant one day. A man entered and took his seat at a table near by and, glancing round and meeting my friend's eye, smiled and nodded

"Excuse me a minute." said my friend; "I must speak to my brother; baven't seen him for over five years."

He finished his soup and lelsurely wiped his naustach before strolling across and shaking hands. They talked for awhile, then my friend returned to

"Never-thought to see him again." observed my friend; "he was one of the garrison at that place in Africa -- what's the name of it that the madh! attacked. Only three of them escaped. Always was a lucky beggar Jim." "But wouldn't you like to talk to him some more?" I suggested. "I can see you any time about this little business

of ours." "Oh, that's all right," he answered; "we have just fixed it up-shall be dining with him to-morrow"

RAW OYSTERS HEALTHFUL?

Question as to Wholesomeness of Biwalve Brings Scoring to the Dealers.

Dysters are pleutiful to an extent that has caused them to be replanted in the beds in some parts of the coast, after they had been carried to market and found unsalable, comments the Newport News How much the connection between typhoid fever and raw oyfters

there is no telling. Some a remuses hold the oyster as not guilty of carrying infection, but oystermen here and abroad have been found to be given to the habit of keeping oysters in water rich in seware and it has given the bivatve a bad name. There is no doubt but some oyeters are the healthlest sort of food when eaten raw but who can tell the contaminated? If a goose has been killed. to the loss of many golden eggs, as it is feared has happened in the raw oyster. business, it is the famit of a few of the ignorant or unerrupulous, and the oystermen must find their way out of the difficulty as best they can. The public appetite for raw oysters was all that could be required by the interest of the oyster gatherers. It has lessened because public confidence has been abused

SNAKE FROM GREAT SPIRIT

Rattler Glides Into Seminale Council Circle and Indians Call It a Messenger.

Great consternation was created among the members of the Seminole round at Weworal T recently when a large rattlesnake glided into the tent where the assemblage was being addressed by the attorney of the nation, Capt A J McKennon, Capt McKennon was about to kill the snake when one of the councilmen stopped him explaining in broken English. "Him rattiesnake, he came to Seminole council; no other anake do that He sent by Great Spirit He to south that mean

Mexico - Wermust all go Mexico -con " The captain was told that the rattleanake had long been a messenger to the Seminole tribe from the Great Spirit. They told him that just before their fight with Jackson in the south, many moons ago, a great rattlesnake crawled from the bank of a lake and came into camp. The medicine men assembled and told the members of the tribe that great trouble was about to come upon them. They would have a great fight, and, as the snake went west, a part of the tribe would be driven west. They said that the rattlesnake had been looked upon as a messenger ever since.

American Shoes Abroad.

Werdo not seem to be making as large an increase in foreign trade as between the years of 1899 and 1901, when the increase per year was over \$1,000,000, but this gradual growth shows that our footwear is giving satisfaction and is wanted abroad, says the Boston Commercial Bulletin. Our shoe manufactuters have been faithful in their workmanship, and have given goods up to sample. This, with the fact that the styles have taken the fancy of the foreign trade, has done much to build up our foreign tracke

Laws in Persia.

They have curious methods in Persia. of insuring law and order. A failure of the crops had resulted in a dear loaf. which much enraged the populace. In order to quell the tumuit, the shad ordered a number of bakers to receive soveral hundred strokes with a rod, besides a few minor little attentions such as the amputation of an ear or two.

Unique Spot.

In the village of Altenburg on whose borders three countries meet, there are no soldiers, no police no taxes, and its people are ruled by no mouarch. The inhahitants speak a queer jargon of French and German combined, and spend their time cultivating the land or working the valuable calamine mine, which is the boast of the village.
